Drape the part E canopy over part A frame.

Loop the six **part D ropes** into the rings on the corners of

Fill six part G weight bags with your desired weight, then use the self-adhering strips to secure one sand bag to

the part E canopy, then secure the ropes with twelve part C stakes.

each part A frame leg.

Make sure to secure the corners with the

attached self-adhering strips.

PARTS

Ver. 1

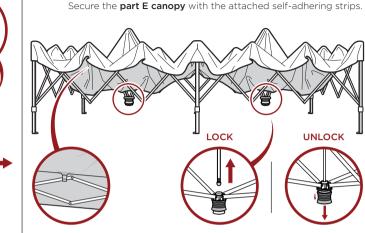

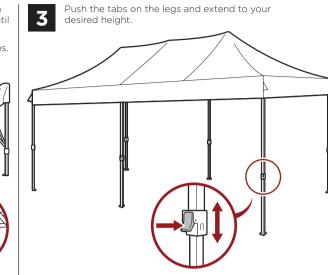

▲ WARNING

- Be careful not to pinch hands or appendages during assembly.
- It is recommended that you use the ropes and stakes to secure the canopy.
- Canopy should not be left up in the rain. This product is not intended to withstand constant rain or inclement weather.
- This product is not intended to withstand periods of extreme/high wind or inclement weather.
- · When not in use, this product should remain closed and stored away to avoid potential damage.
- This product is intended for residential use only.

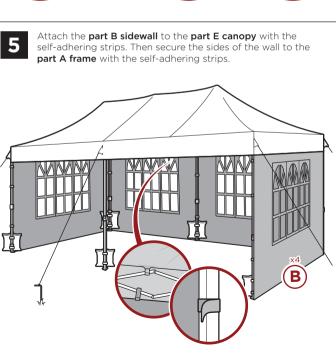

PRODUCT ASSEMBLY

Locate the two central buttons on the **part A frame,** then push the buttons into the receiver until it locks. Spread the frame until it's completely open.

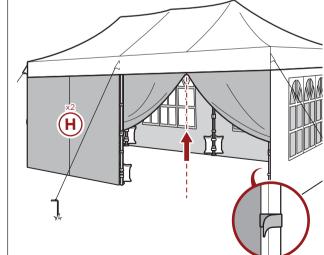

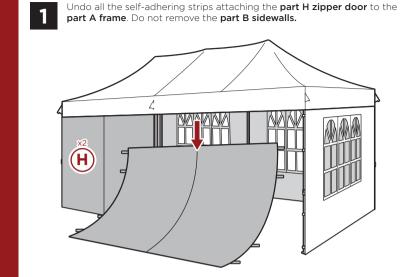

1 PERSON ASSEMBLY | UP TO 10 MIN. ASSEMBLY

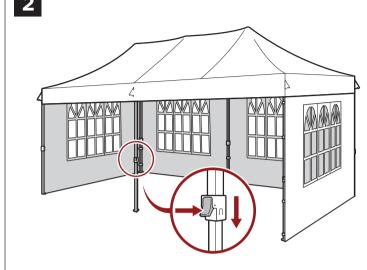

Attach the part H zipper doors to either end of the part A frame with the self-adhering strips.

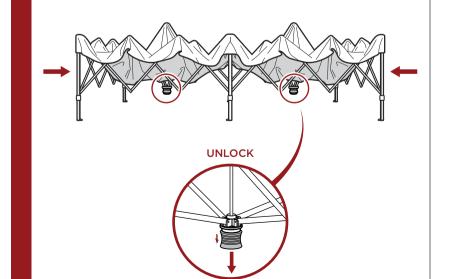

STORAGE

Press the buttons on each leg to adjust them to their lowest setting.

Lower the red sleeve on the central button to release the lock. Pull down the central button mechanism and collapse the frame. Push the legs together.

Place the compacted assembly into the part F carrying case.
