

FORWARD SELF-ADJUSTING BRAKES

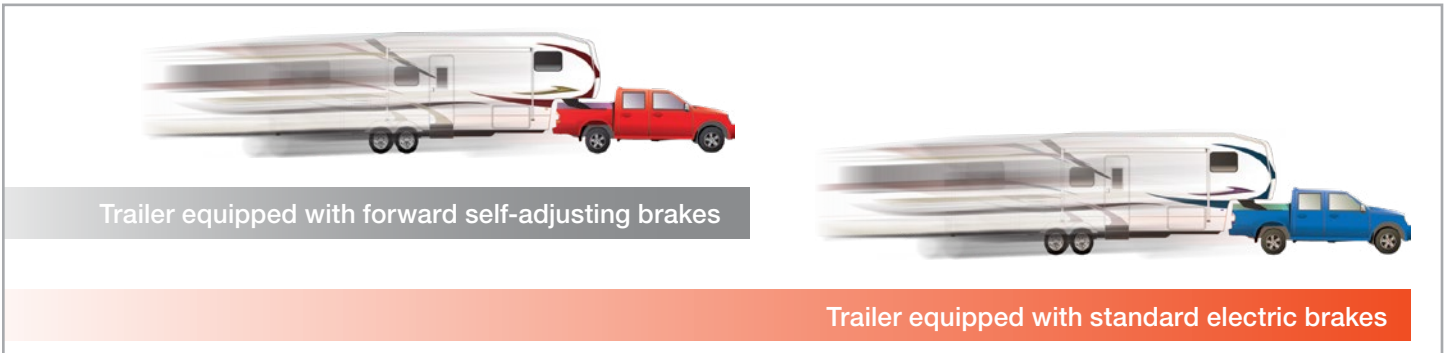

BE PREPARED IN CASE OF AN EMERGENCY STOP

If you need to replace your electric brake assembly, go with a trusted name. Get a genuine Lippert replacement part. Electric brake assemblies are easier to install than hydraulic brakes, and self-adjusting brakes mean you never have to manually adjust them after the initial adjustment. Forward self-adjusting brakes self-adjust during every forward stop, providing up to 50 % better braking distance and preventing premature brake line and magnet wear.

Whenever, wherever, we make your experience better.

BE PREPARED IN CASE OF AN EMERGENCY STOP

Up to 50% better braking distance

Brakes self-adjust during every forward stop, so you can safely brake during emergency and panic stops. They provide optimal brake performance by correcting clearance during every stop. They also prevent premature brake line and magnet wear, which will save you money over the long haul

Additional Features

- Genuine Lippert replacement part
- Left hand (roadside) or right hand (curbside)
- For 13", 14 1/2", 15" or 16" wheels
- Brake size: 12" x 2"
