

WOLVERINEBRASS®

FAUCET AND SHOWER COLLECTION

85035 Finale Pull-Out Kitchen Faucet in Chrome Finish
(Shown on page 5)

Since its quiet beginnings in 1896, Wolverine Brass has consistently focused on putting quality faucets in the hands of professional plumbers. There's a reason why the industry trusts Wolverine Brass products, and it's found in each of those 130 years.

You see it in a laundry faucet that has been in continuous production for nearly eight decades. When a faucet stays in the catalog for three-quarters of a century, you know it won't fail on the job.

In 1973, Wolverine Brass helped redefine modern faucet design with the introduction of the industry's first ceramic cartridge. Now more than 50 years later, that same innovation continues to outperform and outlast the competition.
From the Wolverine Heritage Line to the Wolverine Brass Signature Series, there's been a clear lineage of plumbing expertise passed through the generations at Wolverine Brass.

We're built on legacy, driven by performance and defined by trust.

A variety of finishes.

Stylish faucet finish options engineered for reliability — delivering confidence, superior performance and top-tier quality standards.

Certifications

WaterSense-labeled products and services are certified to use at least 20 percent less water while saving water and performing as well or better than regular models.

Products designed to accommodate people who need accessible facilities.

Dictates that a product has been certified as meeting a weighted average lead content of ≤0.25% when used with respect to the wetted surfaces of plumbing fixtures.

NSF's certification verifies these products do not contain unsafe levels of contaminants, prohibited substances or masking agents, and what is on the label matches what is in the product.
