DIVE for Saxon Physics, 1st Edition

Table of Contents

Lesson #	Lesson Title
1	Units - Scientific Notation - Significant Digits
2	Estimating with Scientific Notation - Precision of a Calculation - Unit Conversions
3	Vectors and Scalars
4	Reference Frames - Average Speed and Average Velocity - Mass and Weight - Density
5	Vector Equations = Forces in Equilibrium
6	Structure of Matter - Temperature
7	Linear Motion and Average Velocity - Average Acceleration
8	Friction
9	Torque
10	Motion Graphs
11	Galileo - Newton
12	Work, Power, and Energy
13	Instantaneous Velocity - Instantaneous Acceleration
14	Free-Body Diagrams - Elevator Problems
15	Static Equilibrium - Beam Problems
16	Simple Machines - Efficiency
17	Sliding Block Problems
18	Bodies in Equilibrium
19	Constant Acceleration
20	Heat - Specific Heat
21	Momentum
22	The Derivative - The Area Under a Curve
23	Center of Mass
24	Freely Falling Bodies
25	Radian Measure - Angular Speed and Acceleration
26	Fluid Pressure - Weight,Density, and Pressure - Fluids at Rest - Pascal's Principle
27	Inclined Plane
28	Gravitational Theory
29	Gravitational Potential energy - Kinetic Energy - Conservation of Mechanical Energy
30	Conservation of Momentum
31	Snell's Law
32	Ideal Gases - Using the Gas Law
33	Two-Body Tension Problems
34	Colors - Wavelengths
35	Circular Motion I
36	Archimedes' Principle
37	Electric Charge - Electric Current - Voltage - Ohm's Law - Resistivity
38	Pressure and Volume - Temperature and Kinetic Energy
39	Liquids and Solids - Phase Changes
40	Wave Motion - Sound Waves
41	Hooke's Law - Elastic Potential Energy

Copyright DIVE, LLC 2001 All rights reserved

42	Electric Power - Sign Conventions
43	Tension Problems with Friction
44	Mechanical Waves - Superposition Principle - Wave Reflections - Speed Along a String
45	Projectile Motion - Motion of Center of Mass
46	Circular Motion II
47	Kirchoff's Laws
48	Conservative Forces - A Third Equation for Uniform Motion - Kinetic Energy Defined - Dot Product
49	Circuit Analysis I
50	Vibrating Systems
51	Circular Motion III
52	Plane Mirrors - Concave Parabolic Mirrors
53	Equivalent Resistance
54	Rotational Inertia
55	Circular Unbanked Tracks - Two Parallel Resistors
56	Ideal Fluids - Flow Rate - Continuity Equation
57	Convex Mirrors
58	Moment of Inertia - Exponential Equations
59	Capacitors - RC Circuits I
60	Thermal Expansion - Phase Changes for Water
61	Bernoulli's Equation
62	Rotational Kinetic Energy - Angulas Momentum
63	Simple Harmonic Motion - COnservation of Angular Momentum
64	Banked Tracks
65	Inertia Combinations - Pulleys with Mass
66	Work and Energy - Heat Transfer - First Law of Thermodynamics
67	Prisms - Total Internal Reflection
68	Capacitor Energy - RC Circuits II
69	Converging Lenses - Diverging Lenses
70	Fundamental Forces - Static Charge - Induce Charge
71	The Simple Pendulum - The Physical Pendulum
72	Sinusoidal Motion - Circuit Analysis II
73	Traveling Waves - Doppler Effect
74	Heat Engines - Second Law of Thermodynamics
75	Mirror-Thin Lens Equations
76	Coulomb's Law
77	Equivalent Capacitance
78	Reasonance Frequency - Standing Waves - Beat Frequencies
79	Thermodynamic States - The Carrot Cycle
80	Electric Fields - Electric Volts
81	The Otto Cycle - The Refrigerator
82	Magnetic Fields
83	Entropy
84	Dielectrics - Ammeters and Voltmeters
85	DC Motors - DC Generators - Inductance
86	Magnets - Self-INductance - Mutual Inductance - Bar Magnets

Copyright DIVE, LLC 2001 All rights reserved

87	Carnot Efficiency
88	Alternating Voltage and Current - Transformers
89	Richter Scale - Decibels
90	Electromagnetic Radiation
91	Speed of Light - Polarization - Wave Theory - Thin-Film Interference
92	Viscous Fluids - Surface Tension - Elastic Properties of Solids
93	The Postulates of Special Relativity
94	The Michelson-Morley Experiment - The Interferometer - The Lorentz Transformation
95	Special Relativity - Simultaneity - Time Dilation
96	Length Contraction - Relativistic Momentum - relativistic Addition of Velocities
97	The Atom - The Photon - The Hydrogen Atom - Electron Clouds
98	Radioactivity - The Electricmagnetic Spectrum - Half-Lite
99	Blackbody Radiation - Photoelectric Effect
100	Early Quantum Physics
