

DYNASHIELD SKIN PROTECTANT

BARRIER CREAM

WeCare DynaShield Skin Protectant Barrier Cream is a zinc-based skin protectant, enriched with aloe vera and vitamins A, D and E. DynaShield acts as a moisture barrier to help protect and promote healthy skin, while helping to reduce rashes and dryness. The ointment forms a protective barrier on the skin to seal out wetness, reduce friction, and help reduce the risk of chafed skin. This cream vanishes quickly after being absorbed into the skin and leaves no residue behind. Available in 4 oz. tubes and 16 oz. jars for convenience in a variety of long-term care facilities, first aid kits, home care, and more.

- * Formulated to help protect minor cuts, scrapes, and burns
- * Contains zinc oxide to prevent and relieve dry skin and diaper rash
- * Enriched with aloe vera and vitamins A, D, and E to nourish skin
- * 1199: Active ingredient Dimethicone helps skin retain moisture and reduce flaking and cracking
- * Ideal for long-term care facilities, first aid kits, home care, and more
