GE Appliances

JBP84SH – GE® 30" Free-Standing Electric Convection Range

Dimensions and Installation Information (in inches)

*Dimension from wall to front of closed door handle is 27-3/8".

Specification Revised 9/04
321572

KW Rating	
240V	11.0
208V	8.3
Breaker Size	
40 Amps†	

†**Note:** Check local codes for required breaker size.

Effective January 1, 1996, the National Electrical Code requires that new construction (not existing) utilize a 4-conductor connection to an electric range.

Receptacle Locations
Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Note: Conforms to U.L. requirements for 0" spacing for adjacent walls below countertops. To reduce possibility of scorching walls, it is recommended a minimum of 1-1/2" spacing be allowed from adjacent side walls to allow for possible extended, high-heat, no-load heating element operation.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

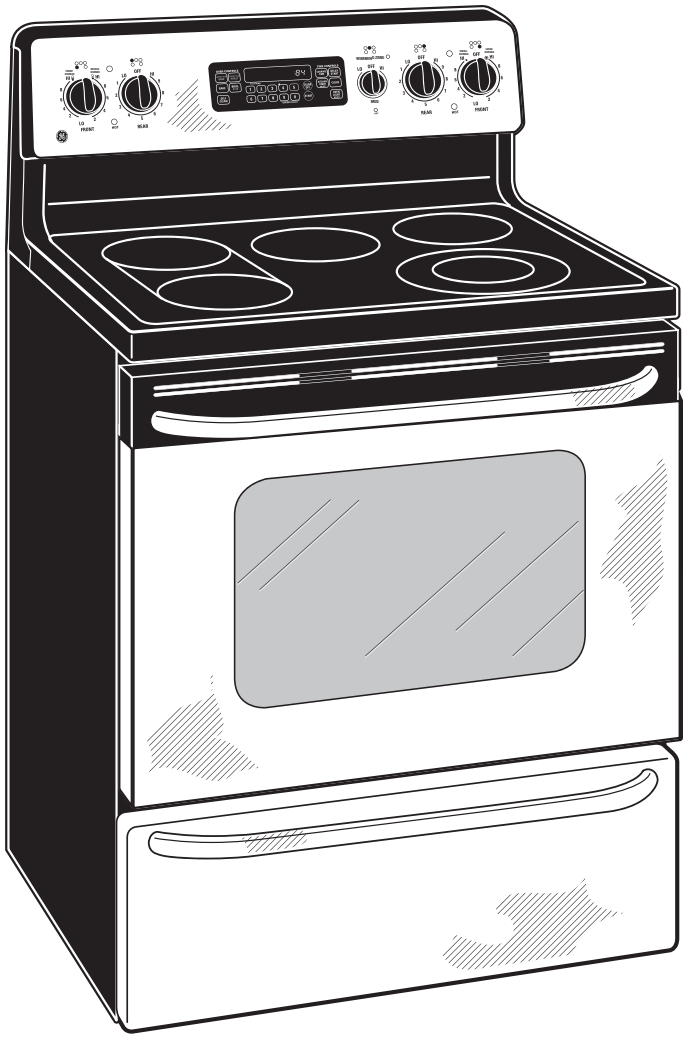

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Listed by Underwriters Laboratories
