

The patented Equa-Flex rubberized equalizer absorbs road shock like a sponge instead of transferring it to the RV and cargo, preventing damage that can be caused by a bumpy ride. Equa-Flex also reduces fore-to-aft movement, often referred to as "chucking," to provide a smooth, comfortable ride. Equa-Flex also scored a 7.5 out of 10 in independent testing, compared to 5.0 by the leading competitor.

Equa-Flex Equalizer Frame Chatter Testing Results

Equa-Flex reduces frame acceleration by 40% at 15-40Hz compared to both MOR/ryde and a standard non-ride enhanced suspension.
