

Cubitron™ 3

Performance Abrasives

A new era of abrasive performance is here.

3M™ Cubitron™ 3 Cut-Off Wheels

3M™ Cubitron™ 3 Cut-Off Wheels with their fast cutting and long-lasting performance improve productivity and efficiency in various body shop cutting processes.

These Cut-Off Wheels are built with the 3M™ Cubitron™ 3 Precision Shaped Grains – designed with sharp, angular structures that continuously fracture to form fresh, sharp points that allow the discs to slice faster, and last longer. They will cut through most materials, including high strength steels, stainless and mild steel.

Our latest 3M Precision-Shaped Grain

We've re-engineered precision-shaped ceramic grain using proprietary breakthroughs in **molecular bonding technology**.

3M Precision-Shaped Grain

3M pioneered the first precision-shaped grain using 3M microreplication technology to form consistent sharp peaks that easily "slice" through metal—cutting cooler, faster, and lasting longer than conventional abrasive grain.

Conventional ceramic abrasive

Conventional ceramic abrasive grain tends to "plow" through metal, causing heat to build up in the workpiece and abrasive, resulting in a slower cut and shorter abrasive life compared to our latest precision-shaped grain.
