Click the up arrow to turn lights on. Press and hold to brighten lights.

Click the down arrow to turn lights off. Press and hold to dim lights.

T-O-WR96

240-Watt Receiver

Press Learning button

T-Q-WR240

Pairing Wireless Controller to a standard receiver (T-Q-WR96 or T-Q-WR240) Pairing Instructions to one zone (T-Q-WR96 shown in illustrations).

1. Remove Controller from back plate. Use included screw driver to remove screw, slide battery compartment open, remove battery, and discard clear plastic tab. Reinsert battery, replace cover, and screw down.

2. If setting the receiver up for the first time, clear the memory by pressing and holding the "Learning Key" button until the lights blink.

3. Very quickly, click and release the "Learning Key" button and, within 5 seconds, quickly click and release one of the "Up arrow" buttons on the Controller. When lights blink once, Controller and Receiver are paired.

NOTE: when pairing additional controllers to the same receiver, DO NOT clear the memory.

Pairing Instructions for additional zones

1. When pairing additional zones to the same Controller, clear the memory on the new Receiver for the next zone by pressing and holding the "Learning Key" button until the lights blink.

2. Very quickly, click and release the "Learning Key" button and, within 5 seconds, quickly click and release one of the "Up arrow" buttons on the Controller. When lights blink once, Controller and Receiver are paired. Repeat process until zones are paired as desired.

Follow instructions included in receiver or lighting to properly hookup lighting system.
