When fluffing your BCP wreaths, garlands, or pathway trees, draw the branch tips away from the center and adjust as necessary.

Garland Fluffing Instructions

1. Remove the garland from it's packaging and lay it on a flat level surface.
2. Straighten any bends or kinks in the garland, then lay it spine-side down.
3. Starting at the bottom end, lift the branch tips away from the spine, spreading the tips upward and outward.
4. Work your way to the opposite end of the garland, laying the tips in the same direction.
5. Adjust the branches as needed.
