# CARE AND MAINTENANCE

## GLASS TILE CARE & MAINTENANCE

---

Although glass tile is impervious to liquids and sealers the sanded grout used in a glass tile project should have a penetrating sealer applied. Urethane or epoxy grouts do not require sealers.

- Only a water based sealer should be used, as this will allow a quick clean-up on the glass tile surface after application. Use of proper tools for application to the grout lines of the penetrating sealer is recommended.

### Cleaning Glass Tile

- Avoid abrasive scrubbing utensils
- Use of a soft cloth or sponge with water will clean most glass tile areas because of the nonporous nature of the product.
- For more stubborn cleanups, commercially available ceramic tile cleaners may be applicable.

**VIRGINIATILE**

Design that shapes living.

Good design is born of creativity and imagination, but as we build and renovate, update and expand, the materials we select will define the quality of the spaces we live in beyond what meets the eye.
