**POWERZONE CONNECT AMPLIFIERS WITH DANTE**

**SOLD AS EACH**

The PowerZone™ Connect with Dante series is a line of DSP-enabled Class-D amplifiers designed to make system installers' lives easier, offering unparalleled reliability and efficiency, along with exceptional system configuration. The amplifiers have a built-in wireless access point for simple connection and easy system setup via Wi-Fi.

## DANTE | SMARTER AUDIO ROUTING

Dante is a digital audio networking technology that allows you to send high-quality, uncompressed audio between devices using standard Ethernet cables. It simplifies installations, reduces cabling, and makes it easy to route audio across multiple zones with low latency and high reliability.
