Care and use

Before using your cookware for the first time, hand-wash it thoroughly. This cookware is designed for use exclusively on hobs, including induction. For optimal energy efficiency, ensure the cookware is placed on a hob ring that matches the size of its base, and avoid allowing flames to extend up the sides or over the handles. To prolong the life of your cookware, it is advisable to use silicone, wooden, or nylon utensils, and avoid overheating or letting the cookware boil dry. Never leave the cookware unattended while in use. Please note that the non-stick coating may become discolored over time, but this does not affect the performance of the cookware. To prevent damage to ceramic hob surfaces, always lift the cookware instead of dragging it. Screws may become loose with use and should be retightened carefully with a screwdriver as needed. Before cleaning, always allow the cookware to cool completely, as it is not dishwasher safe. Hand-wash with a mild detergent and a non-abrasive sponge, rinse well, and dry thoroughly before storing; never store the cookware while wet. Always use heat-resistant oven gloves when handling hot cookware, and never expose hot cookware to cold liquids. If any damage to the cookware is observed, discontinue use and dispose of it safely.
