

/// NEW FOR 2018

KUMA

A DEADLY COMBINATION

The Kuma offers the best of both worlds bringing together speed and comfort. This hybrid cam bow launches arrows at 345 feet per second, and offers a smooth draw and a high-level of forgiveness. Featuring the Bear Cage machining technique, the rigid 1" thick forged riser has been strategically "hollowed out" to lighten the load – yet still prevents side to side flex increasing accuracy. The Kuma features sleeker, smaller, and lighter SonicStops™ dual string suppressors that eliminate noise and vibration.
