

BEAR ARCHERY 2024

To our loval dealers.

As we look back on our 90th year here at Bear Archery, our team wants to thank you for your loyalty and continued support over the years. Our mission is the same today as it was when Fred Bear started this company in 1933, to give people access to the sport of archery by building quality archery products at affordable prices. We continue to design products from youth to adult and from compound to traditional, ensuring our customers have the best possible selection to support the hobby they love. We also remain dedicated to providing the best possible customer service and highest quality products in the industry as we share with you the lineup for 2024. We are introducing an impressive list of new products and technologies that will continue to drive consumers through your doors. Here are some highlights from this year's list of new products.

- The most innovative and feature packed lineup of compound bows, ever!. There are 3 new bows in our Legend line including our new flagship bow, the Persist. The Persist is 31" axle-to-axle and features an all-new lighter weight riser design with a wide stance limb system. The Integrate Mounting System. Picatinny sight mounts, and built in sling and pull up loop make this bow sleek and lightweight. Next up is the Whitetail Maxx. This 31" axle-to-axle bow features our high performance EKO cam system and all new cable roller slide on an innovative new riser design. The poplar Alaskan bow got major feature upgrades on the new Alaskan XT. This bow features our 80% let off hybrid cam on a feature packed new riser. The Alaskan XT is an incredible value at \$659 in a package and includes integrated accessories and a new roller cable slide. The Bear mainline also has 3 new bows for 2024 including the new Adapt Plus. The Adapt was a huge win for 2023 after our multi-year collaboration with our fantastic partners The Hunting Public. The Adapt Plus geta a few upgrades including Mossy Oak Bottomland ® camo, Trophy Ridge Hotwire sight, Hitman Stabilizer, and roller cable slide. Finally, the Paradigm RTH rounds out the new offerings for compounds. This bow has industry leading features including the Intergrate Mounting System ®, Picatinny sight mount, and roller cable slide. All these features are packed onto an innovative new riser and paired with our new 80% DHC cam featuring draw lengths from 27-32".
- Exciting new additions under the traditional line of take downs, recurves, and longbows. We continue to carefully craft traditional bows by hand in our Gainesville, FL facility, and more of these bows are joining the line in 2024. The most exciting new addition is for our younger Bear fans, the new Litte Bear recurve. Hand crafted with a maple riser and available in green or brown glass, this bow is available in weights of 20 and 25 lbs. At \$199, and built in the USA, the Little Bear will be a huge hit with any young archer. Another exciting addition to our traditional lineup are the Fred Bear Longbow TD limbs. These limbs will fit any of our Bear Take Down risers allowing the shooter to create the perfect length bow for them. Finally, new colors have been added to our Mag Riser in "A" and "B" configurations as well as a new color and camo pattern for our popular Fred Eichler Signature Riser we launched in 2023. The AuSable is getting a facelift in 2024, featuring a beautiful shedua riser with a black stripe and finished off with flamed bamboo limbs with black and white tips and cap.
- Revamped Bear X lineup at unbeatable prices. Check out the new Constrictor Pro, Constrictor LT, Domain, Trance, and Catalyst in the 2024 catalog. These crossbows were designed with reliability, performance, and price in mind. Ranging in price from \$349-649, these crossbows are narrow, light weight, and more dependable than any Bear X crossbow ever built. IR speed scopes, TrueX Max bolts, and brand-new attractive color and camo options are sure to impress crossbow customers at every price point.
- Innovative new sights and rests from Trophy Ridge. We continue to build innovative accessories that give our customers confidence on the range and in the field. A host of new sights are new for 2024 including the SWFT 1 pin and SWFT Trio. These drive style sights feature tool-less micro adjustments, click lights, and a full set of sight tapes for accuracy from 20-100+ Yards. Other new sights include Attack & Attack Pro Single pin slider sights and React Pro in Mathews ® Bridge Lock™ AND Picatinny rail mount options. The Propel limb driven rest is also new for 2024. This innovative new rest is available in standard or Integrate Mounting System ® options. The rest features a removable full containment arm, limb attachment bracket, and is available in RH and LH versions.
- Cajun Shore Runner is New & Improved for 2024. A completely revamped Shore Runner is joining Cajun Bowfishing for 2024 and will be available in 3 options. The Winch Pro bottle and Spin Doctor reel packages will continue to be available, and now a bow only option will join the lineup. The new Shore Runner is incredibly light weight at 3lbs, is designed specifically for finger shooting with the large deep grooved cams, and features adjustable draw weight from 20-50lbs.

The relationships we have with you and your employees remains our top priority. We strive to design, build, and deliver superior products to earn and keep your business and satisfy your customer. We are committed to your success and look forward to another year of putting Bear, Trophy Ridge, SIK, and Cajun into the hands of consumers everywhere. Thank you for your continued support!

VIBRATION FREE

In-riser dampeners, innovative string stop with built-in dampening, and <code>KILLERWAVETM</code> limb dampeners eliminate all hand shock

EFFICIENCY DEFINED

Unique to the EFO cam system, this bow is as efficient at the shortest draw length as it is at the longest providing every archer the most energy possible

Introducing the 2024 Bear Archery flagship model – the PERSIST. Nine decades of American made craftsmanship, tradition, and field testing, culminated into this refined design. The PERSIST is stealthier than ever featuring strategically placed in-riser dampeners, innovative string stop with built-in dampening, and new silent shelf technology to make your errant arrows contact with the riser undetectable. Streamlining your bow's profile integrated picatinny sight mount and Integrate Mounting System® rest locations. We have also included an integrated wrist sling mounting point to eliminate unnecessary added parts. Built with the whitetail hunter in mind, we integrated a loop to the limb pocket for quick and secure connection of a pull up rope. For all hunters, we have also added convenient quick-disconnect shoulder sling attachment points as well. The PERSIST is as versatile as it gets with a draw length range of 25"-30", a maneuverable 31" axle-to-axle, and forgiving 6.5" brace height. Boasting up to 90% let-off, the next generation of the highly efficient EKO cam system can generate speeds up to 340fps. At Bear Archery we PERSIST on bringing you the finest bows on the market, and this the finest yet.

SHOCK MANAGEMENT SYSTEM™

(SMS) helps stabilize and reduce lingering riser vibration by up to 25% from the motion of shooting an arrow allowing for a smooth and quiet shot

CAM TECHNOLOGY

allows let off customization to four different positions (75%, 80%, 85%, or 90%)

ALIGN LOK™ TECHNOLOGY works in conjunction with bow sight to aid in aligning second and third axis levels

Ships with the new soft touch GRIZGRIP for a more relaxed and natural grip on the bow and the popular VERSAGRIP™

KILLERWAVE™ LIMB DAMPENING SYSTEM

The KILLERWAVE™ limb dampeners reduce noise and hand vibration in every shot.

The Execute 32 encompasses everything the industry has come to expect in a hunting bow. The compact 32" ATA and 6.5" brace height make this bow maneuverable, comfortable and most importantly - lethal in the field. The Execute offers speeds up to 340 FPS with our most capable and highly adjustable EKO cam system. To enhance the performance of the Execute even more, every Execute ships with a limb stop for a rock solid back wall. The bow fits draw lengths from 26.5-30.5" and features a new parallel limb design with wider and more stable limbs and more efficient machined limb pockets. The Execute 32's revolutionary riser design features a new swing arm cable guard and Shock Management System (SMS) resulting in the most dead-in-hand and quiet shot experience on the market. In addition to the new SMS, the Execute comes with two grips; the popular slim grip so many know and have come to love and an all-new soft touch Grizgrip with a thicker palm-swell for added comfort.

WHITETHILMAXX

The Bear Whitetail is a cornerstone in compound bow history. For 2024, we are proud to launch the Whitetail MAXX, the next generation of this legendary bow. Featuring the EKO cam system, this bow is capable of speeds up to 339fps, while offering the shooter up to an ultra-comfortable 90% let-off. Packed with high end features, the Whitetail MAXX includes a new roller cable guard system to provide an ultimate smooth draw. KillerWave limb dampeners are also in place to make this bow seemingly dead on the shot. At 31" axle-to-axle and adjustable from 26-30 inches, this is the ultimate bow for almost anyone. Trophy Ridge RTH kit includes: Fatal 4-pin sight, Whisker Biscuit-V, 5-Spot quiver, Snubnose stabilizer, peep sight, and D-loop.

- Peep Sight & D Loop

Named after the last frontier and built to endure anything - the new Alaskan XT. This bow is capable of speeds up to 335fps while still providing an easy to shoot 80% let-off. Not only blazing fast, but this bow has a draw length range of 25"-30" and two weight range options: 45-60lbs or 55-70lbs. Integrated picatinny sight mount and Integrate Mounting System® rest locations are machined into the riser, allowing you to mount your favorite streamlined accessories. Additionally, this bow is deadened by strategically placed in-riser dampeners and upgraded with a roller cable slide. All that packed into a forgiving 6.25" brace height and 33" axle-to-axle package.

High end performance and features at an unbeatable price. The 2024 Bear Surpass exceeds all expectations and pushes the limits of what is possible in affordable bow options. Every shot is virtually dead in hand thanks to its in-riser dampeners and KillerWave limb dampeners. While stealthy, this bow packs a punch producing speeds up to 335fps and maintains an 80% let off. With adjustable weight ranges of 45-60 pounds or 55-70 pounds combined with a draw length range of 25"-30", this bow is the perfect companion for any hunter. The Surpass is ultra-maneuverable with a 32 inch axle-to-axle and a 6.25" brace height, perfect for any scenario from the mountains to the hardwoods.

Meet the industry's favorite bow, the Bear Archery Legit. This compound bow is made to legitimately fit all ages and skill levels. We've engineered this bow to be adjustable from a 14" to 30" draw length range and from 10 to 70 lbs. peak draw weight. All adjustments can be made using an Allen wrench and there is no need for a bow press. The bow comes ready to hunt equipped with Trophy Ridge accessories – a Joker 4-pin sight, 5-Spot quiver, Whisker Biscuit, peep sight & D loop. The Legit weighs only 3.8 lbs. and fires arrows at 315 feet per second. The new and improved dual cam system provides a smooth draw cycle. This bow is legit.

From the original Cruzer and Cruzer Lite to the first-choice Cruzer G2, the Cruzer name plate has always carried immense respect across the industry. The legacy continues with the latest generation of the Cruzer line with the Bear Archery Cruzer G3. The G3 brings more performance, adjustability, and practicality than any previous model. The newly improved dual cam system brings arrow speeds up to 315 FPS and can accommodate draw lengths from 14" to 30".

Archers of any size and stature will find the Cruzer G3's 75% let off remarkably comfortable with an adjustable draw weight anywhere between 5lbs and 70lbs. The new G3 comes equipped as a Ready to Hunt setup with a Trophy Ridge sight, quiver, Whisker Biscuit, peep, and D-loop installed from the factory. If you're looking for a solid performing bow for under \$500 that will last for years to come, look no further than the new Cruzer G3.

Grand Bran Take Down

First introduced by Fred Bear more than 50 years ago, the Bear Take Down was a modern and innovative design that revolutionized the archery industry. The Take Down is available in two timeless wood finishes: Black Maple with a phenolic black stripe or Bubinga and phenolic with an inlaid phenolic black stripe.

Limb cores made with maple laminate and overlaid with highstrength black fiberglass

Crowned, cut-on center arrow shelf with leather side plate and bear hair arrow rest

Dynaflight 97 Flemish Twist string

Tips handcrafted and layered with fiberglass

We are proud to partner with world-famous traditional bowhunter, Fred Eichler on a first of its kind aluminum Take Down riser. The Fred Eichler Signature Take Down features a 17" machined riser with Bear's patented Fred Bear latch system. The Eichler Signature riser can be paired with Bear's 1, 2, 3 and Longbow limbs to create a Take Down with a 58", 60", or 62" AMO. The durable and ergonomic design of the bow is the result of immense testing and input from Fred Eichler himself. As the first individual ever to complete the Super Slam (all 29 of North America's big game animals) with a traditional bow, Fred Eichler's knowledge and first hand experience in the field with a recurve is second to none. The low wrist, slim grip design, adjustable strike plate and customizable shelf radius are critical components that give bowhunters the flexibility to tailor the riser to their wants and needs.

Take Down Limbs

Years ahead of their time, Fred Bear's Take Down Limbs brought the industry a new technology and superior performance. Today, these Take Down Limbs are constructed of layered hard rock maple and black fiberglass, and handcrafted tips that are reinforced with black and white fiberglass to accommodate modern strings. Take Down Limbs are available in three lengths: #1, #2, and #3 limbs. The #1 limbs will make a 56" bow on an A-Riser and a 60" bow with a B-Riser. The #2 limbs will make a 58" bow on an A-Riser and a 62" bow with a B-Riser. And the #3 limbs will make a 60" bow on an A-Riser and a 64" bow with a B-Riser.

Kodiak

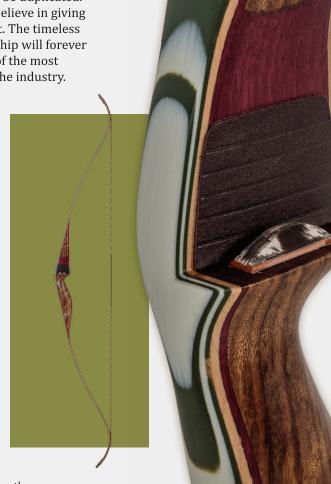

Ask around about Bear bows, and you'll hear tales of the legendary 59 Kodiak. Throughout the years, Bear has been asked to "bring it back." Out of respect, we were convinced the 59 Kodiak could never be duplicated. But, like Mr. Bear, we believe in giving people what they want. The timeless design and craftsmanship will forever make the Kodiak one of the most desirable recurves in the industry.

Kodiak Magnum

Modeled after the original, famous Kodiak bow, the Magnum was first introduced in 1961 as a bowhunter's dream due to its short length and ease of maneuverability. The nimble, versatile design struck a chord with hunters who value its blend of agility and power. The Kodiak Mag returns with the contemporary shedua riser and arctic grey glass limbs.

Super Grizzly

The Original Super Grizzly was available in the mid-1970s and was reintroduced in 2011 to the delight of archers who prefer a smooth-shooting bow. The Super Grizzly's performance is based, in part, on two layers of lamination in the limbs for a better shooting bow without hand shock.

Cheyenne

The Cheyenne was a collaboration between father and son – Grant Neil Byce II, Mr. Bear's retired master bowyer, and Grant Neil Byce III, Bear Archery's director of operations. The bow's length handles the swept-back style limbs of the Take-Down, while the grip is designed to feel full in hand while incorporating the half-moon styling reminiscent of Fred's favorite bows of the early 60s.

Montana

First introduced in the late 1990's, the Bear Montana has quickly become one of the best selling and most sought after longbows in the industry. The Montana is unique in the sense it features a slight reflexed design with tapered limb laminations and slim tips. The construction and craftsmanship of the Montana bring immense performance at an unbeatable price. The Montana receives a few updates including an all-new Phenolic riser variant with iconic arctic grey glass limbs. The new shedua model will be offered in addition to the returning black maple and black glass variant that the industry has come to know and love since its introduction.

Traditional Broadheads

In 1956, Fred Bear introduced the Razorhead to the bowhunting community. It quickly became one of the most respected and widely used broadheads among bowhunters. Introduced in late 2023, Bear Archery has brought back the iconic Razorhead broadhead with a twist of modern technology. The all-new Razorhead VWS (Variable Weight System) features an innovative insert system that is designed to allow bowhunters the ability to customize the weight of their broadhead from 150gr, 175gr, 200gr, and 250gr. The Razorhead VWS Single Bevel is constructed from high-grade stainless steel, engineered to provide optimum penetration through impact, leading to a bone splitting effect and enhanced tissue damage throughout the animal. The broadheads by themselves weigh 150gr and can be used as a glue on point for wooden or swedged arrow shafts. In addition, the Razorhead will come with three different sets of inserts, along with three field points that match the weight of the broadhead. In conjunction with the 150gr heads or field points, you can add one of the three included inserts: magnesium insert will make a 175gr head, aluminum insert will make a 200gr head, and a stainless-steel insert will make a 250gr head. All inserts are designed to fit both aluminum and carbon arrow shafts.

Double Bevel Razorhead Broadhead

KIT INCLUDES

(3) Broadheads, (3) Field Points, (9) Inserts **CUTTING DIAMETER**

Produces 1 1/8" cutting diameter

Traditional Bow Quivers

Leather Kodiak Quiver

Meet the Kodiak Quick Disconnect Quiver by Bear Archery. Available with a polymer or leather hood, the innovative two-piece limb mount quiver is designed to fit all recurve and long bows due to its extreme adjustability and mounting system. The quick disconnect design features a snap-bracketet that can be easily adjusted to fit any width traditional bow limb. The quiver features a durable glass-filled nylon hood designed to accommodate up to five arrows with the largest of broadheads. The unique design allows hunters to easily take the Kodiak Quick Disconnect Quiver off for travel or storage.

DEXTERITY

Designed for left- or right-hand shooters

ACCOMODATING

Secures arrows out of your way with the soft grippers for easy install or removal

INNOVATIVE MOUNTING SYSTEM

Fits both recurve and long bows

Available in right- or left-hand options.

LITE 1 PR

DEALER EXCLUSIVE

The goal was to create a lighter, more accessible, and more compact guiver. The Lite-1 Pro has all the features that make a premium quiver a fast and deadly partner on the hunt - all at less weight. It's the lightest, most versatile quiver yet, and possibly the most capable quiver ever built.

1 bright green LED light inside the hood

3 bright green LED lights on top of the hood

FEATURES:

- Ballistix CoPolymer® construction
- Braided hanging rope for detached
- Customizable mounting bracket fits the quiver higher or lower on the bow
- Dual arrow grippers for fixed or mechanical broadheads

LITE 1 PRO **MSRP** \$74.99

Black AQ500BY

The Retaliate horizontal 5-pin sight features our exclusive React® Technology and an aluminum mounting bracket for extreme durability. No other sight gives you the speed and precision of the React® sights. Faster to sight in and impossible to be inaccurate, React Technology sights will make you a better shooter!

HORIZ PINS

REACT RETALIATE **MSRP** \$179.99

Black AS855D

FEATURES:

• Five .019" horizontal-pin sight featuring innovative React® Technology

- Reduces vibration while maintaining light-weight strength with Ballistix CoPolymer® System
- Make easy corrections with advanced tool-less micro windage and elevation adjustments
- Strengthen accuracy over longer distances with 2nd axis adjustment

Take precision to the next level with the Trophy Ridge Trilogy sight. Each pin is micro-adjustable to consistently provide unparalleled accuracy at all ranges. Yardage adjustments are made with the extended slider which maximizes your shooting range starting at 20 yards. The Delrin bushing eliminates metal-to-metal contact resulting in a smooth, quiet movement. The Trilogy perfectly balances precision with superior durability and strength utilizing an aluminum mounting bracket.

FEATURES:

- Dependable precision with micro-adjustable pins
- Ultimate visibility with ultra-bright .019 horizontal fiber optic pins
- Adjust brightness to suit any shooting condition with the rheostat light
- Includes on-board adjustment tool, rheostat light battery, aluminum mounting bracket and quiver mounting hardware for an easier quiver set up

TROPHY RIDGE

NEW LEVEL OF CONFIDENCE

The industry's most efficient and accurate sight technology is now available in a digital single or three pin option with guaranteed accuracy down to half-yard increments. The Digital React utilizes Trophy Ridge's patented React Technology which mathematically adjusts your yardage indicators to be spot on at any distance. Digital React sights give you the ability to quickly select your desired distance in record time. The sight can be setup using the standard React Technology 2-pin method or a new and even faster SPEED method that requires only one arrow to be sent down range. The Digital React sights offer new features via the large LED screen such as multiple bow profiles, various color and brightness settings, and more.

Adjustable click light to suit any dawn or dusk condition

Glow ring superior in low-light conditions

ALL TROPHY RIDGE SIGHTS COME EQUIPPED WITH WINDAGE AND ELEVATION ADJUSTMENTS.

STRENGTHEN ACCURACY AT SEVERE ANGLES OVER LONGER DISTANCES WITH SECOND & THIRD-AXIS LEVELING

GETTING REACT® SIGHTED IN

React® sights separate into two main categories - single pin sights with yardage indicators and multi-pin sights. Regardless of what type of sight you choose, sighting it in is easy. Follow the steps below.

REACT® SINGLE PIN

3 EASY STEPS

- 1. Sight in your 20-yard pin using the advanced tool-less micro-click windage and elevation knobs.
- 2. Next, step back to 30 or 40 yards and zero your next mark using the elevation drive knob.
- 3. Turn the master adjustment knob until the pointer on the sight lines up with the corresponding yardage indicator. Once you have 2 yardage marks accurately sighted in, all of your indicators are set.

REACT® TRIO

4 EASY STEPS

- 1. Ensure that the sight is in the upmost position with the arrow pointing at the first indicator. Sight in the bottom vertical pin at 40 yards using the tool-less micro windage and elevation adjustments.
- 2. Next, step back to 50 or 60 yards and zero your bottom vertical pin using the elevation drive knob.
- 3. Turn the master adjustment knob until the pointer on the sight lines up with the corresponding yardage indicator. Once you have 2 yardage marks accurately sighted in, all of your indicators out to 100 yards are set.
- 4. Return the sight to the upmost position before sighting in the 20 and 30 yd pins. Now sight-in your 20 and 30 yard pins without moving your indicators or your micro windage and elevation.

REACT' TRIO PRO™

REACT® MULTI-PIN

2 EASY STEPS

- 1. Sight in your 20-yard pin using the advanced tool-less micro-click windage and elevation knobs.
- 2. Next, step back to 30 yards and zero your next pin at that distance using the master adjustment screw. Once you have 2 pins accurately sighted in, all of your pins are set.

PRECISE PRO

MSRP \$109.99 ITEM# AFL114ST

PRECISE PRO

The Trophy Ridge Precise™ Pro Release means pro performance. Its ergonomic 4-finger design allows you to utilize more drawing power while taking advantage of the smooth release provided by the sear-style mechanism. All the pro performance the Precise Pro Release provides makes the perfect choice for any bowhunter seeking a sear-style T handle release.

- Adjustable screw for trigger travel and tension
- Fully adjustable thumb-trigger with travel adjustment
- Rotates a full 360-degree
- · Four finger handle
- Sear-style mechanism provides a smooth release
- · Sling wrist strap

PRECISE

MSRP \$79.99 ITEM# AFL1141T

PRECISE

The Trophy Ridge Precise™ Release was forged with the hardcore archer in mind. This 4-finger T handle release allows you to take advantage of full drawing power. The T handle affords you the luxury of balanced leverage, so you can stay at full draw longer. Be Precise with your release.

- Adjustable screw for trigger travel and tension
- Fully adjustable thumb-trigger with travel adjustment
- Rotates a full 360-degree
- Four finger handle
- Sling wrist strap

DRAWPOINT

Embark on your hunt knowing Trophy Ridge has you taken care of. With the Trophy Ridge DrawPoint Release, you'll feel like we customized this tool just for you.

- Trigger travel adjustment for fine tuning
- D-Loop hook style with hinge spring reset
- Up to 1" length adjustment for a custom fit
- 360-degree swiveling arm that locks into four positions for an unobstructed use
- Buckle style wrist strap
- 360-degree rotating ball joint provides a smooth release

SPOT ON

Enjoy spot-on accuracy and performance with the Spot-On Release. Designed with the bowhunter in mind, a durable ball joint connects to a 360-degree swiveling arm that locks into four different positions for unobstructed use while climbing your tree stand, glassing, and loading your next arrow. Find your perfect fit with up to 1" of length adjustment. Fine tune your shot with the fully adjustable trigger travel. Its premium leather buckle strap makes it the perfect choice for bowhunters and target shooters alike.

- Trigger travel adjustment for fine tuning
- Single jaw hook style
- Up to 1" length adjustment for a custom fit
- 360-degree rotating ball joint provides a smooth release
- Premium leather buckle style wrist strap

10 RING

Burn a hole in the yellow or stick it to your prey with the 10 Ring Release. This compact, dual-caliper release was designed with the bowhunter in mind. It features a durable ball joint connection to a 360-degree swiveling arm that can be locked into four positions for unobstructed use while climbing your tree stand, glassing, and loading your next arrow.

- Trigger travel adjustment for fine tuning
- Dual caliper head provides a crisp trigger and smooth release
- Interlocking jaw system for a perfect release
- 360-degree swiveling arm that locks into four positions for an unobstructed use

TOP NOTCH CONSISTENCY

V-NOTCH TECHNOLOGY (PATENT NUMBER 10,746,500)

Maker of the world's most-popular arrow rest, the original Whisker Biscuit; Trophy Ridge introduces the all-new patented Whisker Biscuit V. The innovative V-Notch naturally centers the arrow using fewer points of contact, eliminating side-to-side arrow movement, resulting in consistent arrow trajectory shot after shot. This arrow rest makes tuning a breeze with its advanced windage adjustment and convenient reference marks giving you incredibly accurate and consistent results time after time.

VRSA LIGHT

The VRSA Light quiver holds five arrows using customizable single or dual arrow grippers - also includes micro diameter arrow grippers to accommodate multiple shaft sizes for a tight, secure fit. The innovative design of this one-piece quiver makes it extremely versatile, allowing you to mount it either on the sight bracket or to the bow riser with one of two included riser mount adaptors. These two mounting features create a low-profile design making it possible to sit tight to the bow. The VRSA Light is assembled with 16" rods and comes with 2 additional 10" rods, allowing you to customize the quiver length. The cam locking lever mechanism is designed to lock the quiver securely in place, along with providing a fast and quiet one-hand removal or attachment. The quiver includes a built-in rechargeable LED flashlight, on the top the quiver. With the light on you can safely navigate in low light conditions. The Trophy Ridge VRSA Light arrow quiver has all the components and features that put it in a class of its own.

TROPHY RIDGE

FEATURES

rods included

- · Riser or sight mount option
- Built-in rechargeable LED flashlight
- Quick attachment design for fast and easy mounting and removal
- · Adjustable low profile design sits tight to the bow
- Riser mount adapters for all manufacturers
- Customizable single or dual arrow grippers
- Micro diameter arrow grippers included

NO TIE ALUMINUM TRU PEEP

The easy to install No Tie Aluminum Tru Peep eliminates the need for serving in your peep and is locked in place by the ingenious crisscross design. Installation is easy and can be done in a matter of minutes. Use a bow press to reduce tension on the bowstring and cables and separate the two strings. Wrap the string along the bottom sidetracks of the peep then through the crisscross pattern before running along the top sidetracks of the peep. Relax the bow press to lock the peep in place and it's ready to go. This bowhunting peep is constructed of aluminum for supreme strength and durability for years to come. The No Tie Aluminum Tru Peep is compatible with all compound bows.

FEATURES

- Ingenious crisscross design eliminates the need to serve in the peep for easy installation
- Crisscross grooves provide secure tie-in
- 3/16" or 1/4" peep housing and 38-degree angle for perfect alignment on every shot
- Aluminum construction provides supreme strength and durability for years to come
- · Compatible with all compound bows
- Available as a 1/4" plastic No Tie Tube Peep,

NO TIE PLASTIC TUBE PEEP

TRU-PEEP

The world's first and favorite peep sight, the Trophy Ridge Tru-Peep is all-aluminum with a legendary design that allows for a perfectly round, shaded hole at full draw. The Tru-Peep eliminates the need for protruding hoods and is kept in place by a reliable safety-tie groove. The Tru-Peep is available in eight sizes and five colors.
