TASKI®

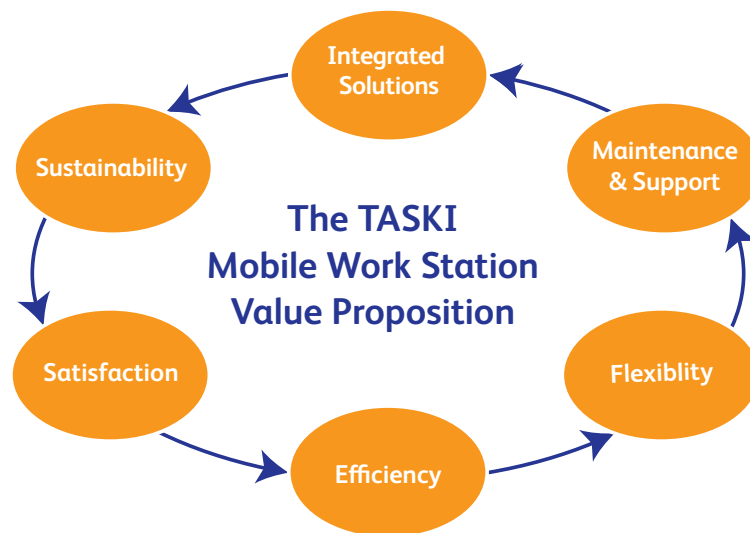

Mobile Work Stations and Cleaning Tools
High Performing. Productive. Ergonomic. Sustainable.

TASKI® Mobile Work Station Cleaning System

A revolutionary program for increased efficiency, sustainability and satisfaction.

The TASKI Mobile Work Station offers a range of configurations to accommodate the way you work, but it's about more than intelligent design. The TASKI Mobile Work Station is part of a complete cleaning system of tools, chemicals and machines offering an integrated approach that delivers improved cleaning performance.

Flexibility

You can configure TASKI Mobile Work Station models to meet your facility's exact requirements. Modular components allow you to adapt the work station to future needs or job types. The work stations are designed for working with multiple cleaning methods like spray-and-wipe or pre-wetted cleaning, allowing you to work the way you want, when you want.

Efficiency

Studies show the TASKI Mobile Work Stations are proven to reduce the time spent at the work station and on cleaning assignments. The work stations provide sufficient space for needed supplies and tools, ensuring everything needed is on-board and reducing time spent on non-value added activities. A more efficient cleaning system also helps to reduce chemical usage and the overall cost to clean.

Satisfaction

Rated as more convenient based on the location and accessibility of cleaning tools/supplies*. In ergonomic research, users of the TASKI Mobile Work Station required significantly less muscle effort. These work stations reduce the need to twist and bend, lessening worker fatigue with features like 4-wheel steering which increases maneuverability, and adjustable cart and tool handles to reduce body strain. Changing mop heads is fast, ergonomic and requires no contact with hands, keeping users safe and healthy.

Sustainability

The TASKI Mobile Work Station Cleaning System significantly reduces both water and chemical usage compared to other cleaning systems.* This not only helps the environment, but it also helps your budget. TASKI Microfiber products support Leadership in Energy and Environmental Design (LEED) certification efforts.

Integrated Solutions

TASKI Mobile Work Stations seamlessly incorporate tools, chemicals, machines and processes to deliver next-level cleaning performance. Features like cloth boxes, lockable drawers and vacuum platforms allow you to outfit your work station in a way that best fits your facility's needs, all while utilizing the best solutions in the industry.

Maintenance & Support

TASKI Mobile Work Station cleaning systems are backed by a team of customer service representatives and application experts that are available to answer any questions that may arise. All TASKI Mobile Work Station parts and components are covered under warranty and it is quick and easy to request warranty parts, if needed. TASKI Mobile Work Stations are built to last and are durable to withstand even the toughest cleaning environments.

TASKI Mobile Work Station Models

TASKI Mobile Work Station Model S6

Offers microfiber mopping, premium waste collection and laundry with adequate storage capabilities.

D6050720

TASKI Mobile Work Station Model S12

Promotes microfiber mopping and adequate waste collection and laundry with premium storage capabilities.

D6050691

TASKI Mobile Work Station Model S13

Accommodates vacuum capabilities while offering adequate storage and waste collection and promoting microfiber mopping.

D6050762

TASKI Nano Work Station Model N1

Designed for restroom cleaning this model offers ample storage space for cleaning solutions and inventory items.

What is microfiber?

Microfiber is a synthetic fiber that can be split through a unique manufacturing technique to a diameter of 1/100th of a strand of human hair, which is smaller than most bacteria and dust particles. These fibers are then knit through a special process to make cleaning cloths and mops. Microfibers, when used dry, create a static charge which attracts dry soil, bacteria and dust. When used damp, they can absorb up to 900% of their weight and use capillary action to lift and trap dirt, moisture and bacteria.

No residue

The wedge-shaped fiber allows more contact with a surface, and can loosen, attract and absorb all types of soil and bacteria from a surface.

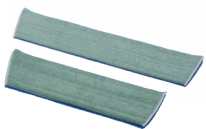

Residue

The rounded fibers of traditional mops or cloths provide less contact with surfaces, which makes soil and water pick up less effective, often leaving a sticky residue or film on the floor.

Floor Mopping with Microfiber

The products can be used DRY or DAMP:

- Used dry, the soil and bacteria is attracted into the fibers by static charge.
- Used damp, the soil and bacteria is attracted into the fibers by capillary action.

Dry Mops

TASKI Dry Mops are specifically designed for dry mopping of smooth and slightly structured hard floor surfaces in areas which have high demands of dust reduction and need regular cleaning. The fine looped fibers of this microfiber mop make it easy to pick up dust, dirt and hair using static charge attraction.

- Excellent dust pick-up and glide properties
- Effective bacteria and spore removal
- High mop durability provides 800 washes for MicroUltra or 500 for MicroStandard
- High efficiency and productivity

Item	Description	Pack
D5787578	MicroStandard Dry Mop 24 in. (60 cm)	20/Pack
D5787560	MicroStandard Dry Mop 16 in. (40 cm)	20/Pack

Microfiber Cleaning Tools

Damp Mops

The TASKI Damp Mops are specifically designed for damp mopping in high traffic areas that require regular cleaning. The mop's extremely fine fibers improve surface contact, removing more soil and grease.

- Excellent cleaning, absorption and glide properties
- Effective, proven bacteria removal
- High mop durability provides 800 washes for MicroUltra or 500 for MicroStandard
- High efficiency and productivity

Item	Description	Pack
D5787527	MicroUltra Damp Mop 16 in. (40 cm)	10/Pack
D5787551	MicroStandard Damp Mop 16 in. (40 cm)	20/Pack

TASKISUM Single Use Mops

Disposable microfiber pads specifically designed for pre-wet or dry mopping in areas and environments where re-usable microfiber mops are not practical or accepted practice.

- Work great damp or dry
- Excellent dust and dirt pick-up
- Streak-free and lint-free cleaning
- Available in 16 in. or 24 in. length

Item	Description	Pack
D7523512	TASKISUM Disposable Microfiber Mop 16in. (40cm)	25/Pack
D7523513	TASKISUM Disposable Microfiber Mop 24in. (60cm)	25/Pack

Mopping Tools-Frames

The new generation of Ultra Plus handles and frames, specifically designed for the TASKI system.

Easy-to-Use

- Soft rubber grip makes handling very user-friendly
- Top of the handle is rubber-coated to prevent sliding when placed against walls or tables
- All Ultra Plus handles can be autoclaved for sterilization

Ergonomic and Adjustable

- Ergonomic handles allow the user to clean with little effort
- Can be adjusted to the appropriate working height
- Available in two sizes: Large (40-67 in. / 100-170 cm) and Small (24-42 in. / 60-105 cm)
- Handles can fold flat to reach under beds and other hard to reach areas

Cleaning Cloths

The TASKI microfiber cloths are manufactured using the highest quality materials available to guarantee superior cleaning performance. The cloths provide optimal soil pick-up properties for excellent cleaning and hygiene results.

Effective and Easy-to-Use

- Fine fibers allow for easy pick-up and removal of the smallest dust particles, dirt and grease
- Cloths are washable and reusable
- High quality microfiber material
- Cloth is easy to wring out

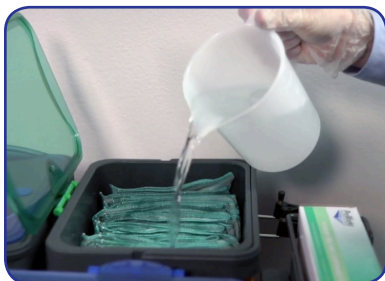

Versatile

- Cloths are designed to clean multiple surfaces
- Colored cloth options allow for pre-designated cleaning applications, helping to reduce the potential for cross-contamination
- Appropriate for dry, damp and spray-and-wipe cleaning

Item	Description	Pack
MyMicro - 300 WASHES

D5787105	MicroUltra Cloth XL -Red	20/Pack
D5787113	MicroUltra Cloth XL -Yellow	20/Pack

Pre-Wetted Mops & Cloths - Pre-wetting is when microfiber cloths/mops are dampened with a pre-determined amount of diluted solution, eliminating the need for wringing.

- A single or multiple cloths/mops may be used in this process, dependent upon the task(s).
- Color coded cloths maybe be used for different tasks, helping minimize cross-contamination
- Ergonomic for end users, as cloths and mops glide, reducing drag and awkward twisting associated with the wringing and use of traditional mops and cloths
- Significant reduction of water and chemical usage for floor and surface cleaning

Specialty Products & Tools

EasyWipe Disposable Wiping System – Wipes On Demand

Cleaning Cloths - Disposable Wipes

Versatile

- Create customized wipes by simply adding a cleaner or disinfectant
- Bucket can be re-used with EasyWipe refill

Effective

- Specially treated wipes don't bind with cleaning chemicals or disinfectant actives
- High quality fiber allows for effective removal of soil and microorganisms

Efficient

- Reduces labor – accurately loaded wipes require no wringing and limited set up time
- Extended shelf life of disinfectants and bucket closure system allows wipes to be used across multiple shifts
- Reduces chemical waste as each wipe is accurately loaded with chemical
- Eliminates the need for laundering of cloths, saving time and money

Safe

- Reduces the risk of chemical splashes and spills
- Enclosed system reduces the risk of cross contamination

Item	Description	Pack
D5768748	EasyWipe Disposable Wiping System 120 Wipes	6/Case

D5787586	Interior Mop Sleeve	5/Pack

TASKI Zorba Leak Lizard

The NEW and IMPROVED TASKI Zorba Leak Lizard is the next generation of the TASKI Leak Lizard with the same amount of material as the previous version, but with enhanced features and benefits.

A highly absorbent, disposable strip that can be used to control leaks and spills in a wide range of application areas. Use to control stripper solution, absorb condensation, control refrigerator leaks and enhanced kitchen, restroom, window, swimming pool and hospital room cleaning. New features include a chevron designed change indicator and reenforced strips that allow the absorbance of more liquid per strip to prevent leaks.

Each box contains 50 (2ft) perforated sections of absorbent strips.

Item	Description	Pack
D7523269	TASKI Zorba Leak Lizard Control Strip 100 ft. (30 M)	50/Pack

Machine Solutions

TASKI Aero 8 Plus and 15 Plus

TASKI Aero canister vacuums offer solutions that differentiate them from the competition with best-in-class low power consumption and noise level while delivering high cleaning efficiency. The machines are robust, intuitively designed and allow easy handling and work ergonomics for an improved total cost of ownership and customer satisfaction. The TASKI Aero is a clever option offering simple adaptation to customer needs.

TASKI Jet 38 and 50

The TASKI jet 38 and 50 are professional, upright vacuum cleaners engineered with a dual motor system providing high suction power and efficient cleaning performance. These vacuums are very operator friendly due to the robust, ergonomic handle that can be adjusted to two positions based on user height. The TASKI jet vacuum cleaners are ideal for use in office buildings, conference rooms, school classrooms, department stores, hotel rooms and other small to medium areas featuring carpet.

TASKI Aero 8 PLUS and 15 PLUS

The TASKI swingo 150 is an ultra-compact, upright auto scrubber featuring a lightweight, compact design that is perfect for quick and easy cleanup in confined areas. The functional design of the TASKI swingo 150 machine is similar to conventional upright vacs; the machine requires limited training, is simple to use and can be prepared for cleaning in less than 60 seconds. With a light weight of 24-lb (11-kg) in total and only 3-lb (1-kg) handle weight with a full tank, the machine can be easily pulled in any direction. The TASKI swingo 150 is available as a corded, electric unit or as a lithium ion, battery-powered unit.

Spitfire® Professional All Purpose Power Cleaner

Spitfire® power cleaner is the market's most beloved power cleaner. The super-strength formula penetrates and dissolves tough soils within seconds allowing for fast and easy removal of dirt and grime. This safe and powerful all-purpose cleaner gets the job done when other cleaning products can't. Remove ink, crayon, marker, adhesive, gum, food soils, scuff marks, grease, oil, and daily soil buildup from any washable surface.

All Purpose Virex® Disinfectant Cleaner

Virex is a ready-to-use, quaternary-based, hospital-grade disinfectant that provides excellent cleaning and deodorizing in one step. All-purpose Virex disinfects in three minutes. It is a bactericide, tuberculocide, virucide and fungicide that kills Norovirus, VRE and MRSA. Virex meets bloodborne pathogen standards for decontaminating blood and body fluids.

Glance® Powerized Professional Glass and Surface Cleaner

Glance® is the leading brand in the janitorial and housekeeping market. Trusted for decades and admired for its quick-drying and streak-free shine. Our chemists powerized the formula with ammonia and additives to outperform other glass cleaners on the market. Glance leaves a brilliant shine on glass, mirrors, sinks, countertops, stainless steel and many other washable surfaces.

Crew® Shower Tub & Tile Cleaner

Crew® is the best-selling restroom brand in the janitorial industry. The Shower, Tub & Tile Cleaner is the all-purpose acidic cleaner in the family. It is specifically formulated to remove soap scum, water deposits, rust, body oils, dirt and grime from restroom surfaces. Commonly used in areas where water is present: showers, tubs, toilets, urinals and sinks. This non-abrasive acidic cleaner makes cleaning faster and easier.

Floor Science® Neutral Floor Cleaner Citrus Concentrate

Formulated for everyday cleaning of floors and other hard surfaces. This product does not dull floor finishes and does not require rinsing. Floor Science Neutral Floor Cleaner delivers state-of-the-art performance and cost efficiency. Use the complete Floor Science system to create and maintain a consistently brilliant shine on floors with minimal time and effort.
