

THE BATTERY

1. The battery is the power source for the vehicle.

2. It provides the electrical energy to start the engine.

3. It provides the electrical energy to power the lights and other accessories.

4. It provides the electrical energy to power the radio and other electronic equipment.

5. It provides the electrical energy to power the horn and other warning devices.

6. It provides the electrical energy to power the windshield wipers and other safety devices.

7. It provides the electrical energy to power the power windows and other convenience devices.

8. It provides the electrical energy to power the power locks and other security devices.

9. It provides the electrical energy to power the power mirrors and other convenience devices.

10. It provides the electrical energy to power the power seats and other convenience devices.

11. It provides the electrical energy to power the power windows and other convenience devices.

12. It provides the electrical energy to power the power locks and other security devices.

13. It provides the electrical energy to power the power mirrors and other convenience devices.

14. It provides the electrical energy to power the power seats and other convenience devices.

15. It provides the electrical energy to power the power windows and other convenience devices.

16. It provides the electrical energy to power the power locks and other security devices.

17. It provides the electrical energy to power the power mirrors and other convenience devices.

18. It provides the electrical energy to power the power seats and other convenience devices.

19. It provides the electrical energy to power the power windows and other convenience devices.

20. It provides the electrical energy to power the power locks and other security devices.

21. It provides the electrical energy to power the power mirrors and other convenience devices.

22. It provides the electrical energy to power the power seats and other convenience devices.

23. It provides the electrical energy to power the power windows and other convenience devices.

24. It provides the electrical energy to power the power locks and other security devices.

25. It provides the electrical energy to power the power mirrors and other convenience devices.

26. It provides the electrical energy to power the power seats and other convenience devices.

27. It provides the electrical energy to power the power windows and other convenience devices.

28. It provides the electrical energy to power the power locks and other security devices.

29. It provides the electrical energy to power the power mirrors and other convenience devices.

30. It provides the electrical energy to power the power seats and other convenience devices.

DISASSEMBLY

| Part No. | Description | QTY |
|----------|------------------|-----|
| 1 | Battery | 1 |
| 2 | Terminal Post | 2 |
| 3 | Mounting Bracket | 2 |

1. The battery is the power source for the vehicle.

2. It provides the electrical energy to start the engine.

3. It provides the electrical energy to power the lights and other accessories.

4. It provides the electrical energy to power the radio and other electronic equipment.

5. It provides the electrical energy to power the horn and other warning devices.

6. It provides the electrical energy to power the windshield wipers and other safety devices.

7. It provides the electrical energy to power the power windows and other convenience devices.

8. It provides the electrical energy to power the power locks and other security devices.

9. It provides the electrical energy to power the power mirrors and other convenience devices.

10. It provides the electrical energy to power the power seats and other convenience devices.

11. It provides the electrical energy to power the power windows and other convenience devices.

12. It provides the electrical energy to power the power locks and other security devices.

13. It provides the electrical energy to power the power mirrors and other convenience devices.

14. It provides the electrical energy to power the power seats and other convenience devices.

15. It provides the electrical energy to power the power windows and other convenience devices.

16. It provides the electrical energy to power the power locks and other security devices.

17. It provides the electrical energy to power the power mirrors and other convenience devices.

18. It provides the electrical energy to power the power seats and other convenience devices.

19. It provides the electrical energy to power the power windows and other convenience devices.

20. It provides the electrical energy to power the power locks and other security devices.

21. It provides the electrical energy to power the power mirrors and other convenience devices.

22. It provides the electrical energy to power the power seats and other convenience devices.

23. It provides the electrical energy to power the power windows and other convenience devices.

24. It provides the electrical energy to power the power locks and other security devices.

25. It provides the electrical energy to power the power mirrors and other convenience devices.

26. It provides the electrical energy to power the power seats and other convenience devices.

27. It provides the electrical energy to power the power windows and other convenience devices.

28. It provides the electrical energy to power the power locks and other security devices.

29. It provides the electrical energy to power the power mirrors and other convenience devices.

30. It provides the electrical energy to power the power seats and other convenience devices.
