

4K COLOR NIGHT VISION IP CAMERAS

CELEBRATING
75
YEARS
OF INNOVATION

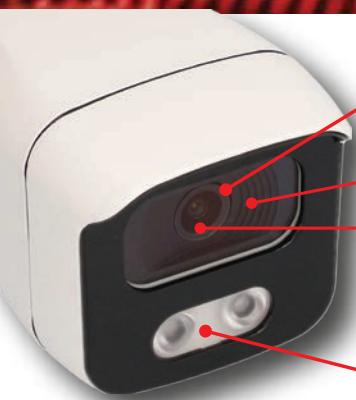

SPY-MNBLT3WIP8 *Mini Bullet Style*

SPY-MNDM3WIP8 *Mini Turret Dome Style*

Record in 4K resolution with a small but powerful IP camera that captures video up to 8MP at 30 fps, for a crisp, clear picture, even in low light or dark conditions. The advanced CMOS sensor has the latest technology to provide color night vision with superior picture quality and better clarity in low light. For completely dark environments, smart IR LEDs can see objects up to 25 meters away at night and automatically adjust the IR LED brightness to avoid a washed out image. A built-in microphone records audio and the camera's H.265+ video compression reduces bandwidth and video storage demands without sacrificing the video quality.

- 2.8mm fixed lens
- 8MP CMOS sensor
- 4K resolution IP camera
- IR LEDs for night vision

- Choose color night vision or smart IR LEDs setting based on the environment
- Color night vision:
 - Uses the latest technology for low light conditions
 - Works best with an existing ambient light source and areas with streetlights
 - Must be enabled through the camera's configuration menu
- Smart IR LEDs:
 - Automatically adjusts the IR LEDs for night vision up to 25 meters
 - Prevents images from appearing washed out if too close to the IR LEDs
 - Works best for completely dark environments with no ambient light source
- Supports 1080p/30, 4MP/30, 6MP/30, & 8MP/30 resolutions
- Water-resistant, rated IP67
- Supports H.264, H.264+, H.265 & H.265+
- Built-in microphone
- Built-in PoE
