

QUESTION

What is the
condition?

1. The object is a long, slender, curved bone, possibly a rib or a part of the spine. The hook-like structure at the end is a characteristic feature of a rib head, which articulates with the vertebral body and the transverse process of the vertebrae.

ANSWER

1. The object is a long, slender, curved bone, possibly a rib or a part of the spine. The hook-like structure at the end is a characteristic feature of a rib head, which articulates with the vertebral body and the transverse process of the vertebrae.

2. The object is a long, slender, curved bone, possibly a rib or a part of the spine. The hook-like structure at the end is a characteristic feature of a rib head, which articulates with the vertebral body and the transverse process of the vertebrae.
