## **Care and use**

Please retain these instructions for future reference. Before first use, ensure that you hand-wash the cookware thoroughly. This cookware is suitable for use on hobs only, including induction, and is not suitable for deep fat frying. For optimal energy efficiency, position the cookware on hob rings that correspond to the size of its base, taking care not to let flames extend beyond the sides or handles. To prolong the life of your cookware, it is advisable to use silicone, wooden, or nylon utensils and to avoid metal utensils. Additionally, do not overheat the cookware or allow it to boil dry, and never leave it unattended while in use. Please note that the non-stick coating may discolour over time, but this does not impact functionality. To prevent damage to ceramic hobs, always lift the cookware rather than dragging it across the surface. Be aware that screws may loosen over time; if so, carefully retighten them with a screwdriver. When cleaning and storing the cookware, always allow it to cool first. This cookware is dishwasher-safe with mild detergents, but it is recommended to hand-wash it using a mild detergent and a non-abrasive sponge, rinsing and drying thoroughly afterward. Do not store wet cookware. As a precaution, always use heat-resistant oven gloves when handling the cookware, and never expose hot cookware to cold liquid. If you observe any signs of damage, dispose of the cookware carefully.
