High Heat Protection • Part #234-Z

FEATURES

- 14" length
- Made from 35 oz. Zetex
- Five-finger style
- Wool lined
- High heat resistance

234-Z

About Zetex®

Zetex® is woven from continuous filament yarn that has been treated with a proprietary texturization process, which gives Zetex® its superior insulation capabilities. It is an excellent fabric for applications requiring thermal and acoustic insulation, or protection from heat and fire.

Zetex® can withstand continuous operating temperatures up to 1000°F (540°C), and intermittent contact at peak temperatures up to 1300°F (700°C).

PLEASE NOTE: These temperature ratings are guidelines and depend on the environment and application in which the material is being used.
