

### What's In The Box

One (1) HBC5 lens

### Tools Needed

A phillips #2 screwdriver is required to remove and install the lens.

## Installation

### 1 Lens Removal

- Place fixture face up on a stable work surface.
- Remove sensor cover (A) by unscrewing.
- Remove eleven (11) screws from the lens. Four (4) with clamps (B), four (4) on edges (C) and three (3) in center (D) without clamps.
- Lift lens (E) from fixture. Be careful not to touch LEDs.

### Lens Installation

- Place lens (E) on fixture, aligning clamp recess to fixture positions. Ensure any gaskets are properly aligned and not pinched.
- Install eleven (11) screws from the lens. Four (4) with clamps (B), four (4) on edges (C) and three (3) in center (D) without clamps.
- Install sensor cover (A) by screwing in.
