

NITRILE COATED IMPACT GLOVES

Our SpeedKnit™ M-Pact® S5EP02 Chemical gloves are fully coated in nitrile to prevent chemicals, oils, solvents, acids and caustics from contaminating hard working hands. We use a machine-knit blend of high dexterity 18-gauge HPPE and glass coated with sandy nitrile to achieve ANSI A4 cut resistance. Our ergonomically designed TPR is sonic welded for a seamless fit and ANSI Level 2 impact resistance.

FEATURES

- High dexterity 18-gauge HPPE + Glass knit construction protects working hands against punctures and lacerations.
- Gauntlet cuffs allow for easy on and off convenience.
- Anatomical M-Pact TPR meets ANSI 138 Level 2 impact standard.
- Rugged nitrile coating protects the user from harmful liquids and chemicals like sulphuric acid.
- Dual coated sandy nitrile palm with textured grip offers high abrasion resistance and wet grip performance.
- Durability performance meets ANSI Level 4 abrasion standard.
- Cut performance meets ANSI A4 cut resistant standard.
- Machine washable and dryable.

WASHABLE

INTENDED USES

- Oil & Gas
- Fueling
- Construction
- Fluid Maintenance
