40500-2 – Activity Supplies Kit For Exploring Creation with Zoology 2, 2nd Edition

Greetings!

Thank you for purchasing the Zoology 2, 2nd Edition *Activity Supplies Kit*! If your children enjoy a fun, hands-on approach to learning, then this activity driven course will be engaging from cover to cover.

So that you will understand the organization and contents of this kit, please look through these introductory notes and comments. While we strive to include as many supplies as possible, it is impossible to include every item that will be needed. We assess the inclusion of each activity, or item, based on cost, long term availability of the item, allergy exposure, and ease of distribution. This is an incredible course filled with wonderful things to explore. It is imperative that you plan, in advance, for the activities which are not provided in this kit.

Reading the *Lesson Bag* labels

Supplies are organized into bags according to the text's lesson numbers. Supplies for **lesson one** are contained in **bag one**, etc. Because many items are used for more than one activity, each label not only identifies the items in the bag, but also directs you to the location of additional items that you will need. By returning each reusable item to its original lesson bag, the labels will direct you through the kit with ease. The labels also reveal the items that you will need to provide.

You will find that many activities require not only time and organization, but also require items that **you will need to provide**. Once you have everything ready to go, we believe that your study through this text will be a rewarding, informative, and enjoyable way of learning many new things about our Creator and the *Swimming Creatures* He has made.

Quick Reference

Within these introduction pages you'll find a quick reference list for the exact supplies in each lesson bag. This list has omitted the directives for finding additional supplies and lists only what is actually contained in the bag.

This **Quick Reference** list is followed by a **You Provide** list of supplies that you will need to provide. These lists are organized by lesson number.

Things to Know

Since it is impossible to include all possible colors of paint and air-dry clay, your kit contains a basic color selection of both paint and air-dry clay. Enjoy the discovery of mixing and matching to create your desired color.

Safety Instructions

- Thoroughly read all instructions for each activity.
- Activity 7.8, page 164, calls for 30% Hydrogen Peroxide. A solution of 3% Hydrogen Peroxide is included in this kit. It is safer for young families and works really well. You'll love doing this activity! Don't forget to wear your safety Glasses!
- Scissors, wire cutters, needles, stoves, power tools, and kitchen knives are needed to complete some activities. Parents or other adults must supervise each activity.
- Never eat any ingredients unless the instructions specifically say to do so.
- Do not put any activity supplies in your mouth.
- Wear an art smock or apron to avoid damage to clothing.
- Tie back long hair from your face so it doesn't block your view or get caught in any equipment.
- Complete activities in a well ventilated area.
- Keep your work area clean.
