

# PSx2<sup>®</sup>

DUAL MOTOR POWER STABILIZER

## The Next Generation of Stability.

### INTRODUCING A **FASTER,** **MORE ROBUST STABILIZER**

New for 2019, the PSx2 Stabilizer adds several improvements to the PSx1 Stabilizer which was first introduced in 2005. Easily retract and extend the jacks with the flip of a switch. In just a few minutes, the coach will be stable, so you can spend less time setting up camp and more time enjoying your vacation. Power Stabilizer Jacks are an affordable way to upgrade to power stabilization and easily bolt on to the existing frame.

## Features

- PSx2 tested 30% more stable than previous versions of the power stabilizer.
- 2 motors add increased stability. Constant motion can cause a motor to “backdrive” which decreases stability. Backdrive becomes more difficult when there are 2 motors instead of one.
- One switch instead of 2 switches provides 50% faster operation over the competition.
- One independent switch operates the two motors and legs simultaneously preventing frame twist which can cause several issues with the RV.
- Integrated breaker technology is designed to help prevent the user from damaging the stabilizers as well as damaging the RV itself by amping out before attempting to lift the trailer.

part no.	description
695602	PSx2 Power Stabilizer

- FRONT AND REAR MOUNTING APPLICATIONS AVAILABLE FOR MAXIMUM STABILITY
- STABILIZER AUTOMATICALLY ADJUSTS TO THE TERRAIN SO UNEVEN GROUND IS NOT AN ISSUE
- NEW MOTOR IS 2X FASTER THAN PREVIOUS MOTOR FOR QUICKER SETUP
- EACH LEG INDEPENDENTLY CONTROLLED BY SEPARATE MOTORS

- POWDER COAT FINISH STANDS UP TO THE ELEMENTS
- NEW EMBOSSED LEGS ADD STRENGTH
- HEAVY GAUGE STEEL CONSTRUCTION
- LEGS EXTEND UP TO 30°
- 30% MORE STABLE
- DUAL MOTORS
