- Keep water and organic material away from pole. Pole can rust and fail.
- Check system BEFORE EACH USE for loose hardware, instability and signs of corrosion and repair before each use. Never play on damaged equipment.
- Once a month check pole and all metal parts for rust. Completely remove rust and repaint with exterior enamel. If rust has penetrated any steel part, replace that part immediately.

Raise Backboard to 10 FT. regulation playing height. Measure from top of rim straight down to the playing surface.

Using tape - mark the side of the steel actuator (#12) just under the plastic actuator sleeve (#13) at this 10 ft rim height. See **Figure 1**.

Lower backboard all the way down. Do not force actuator once backboard is in it's lowest position. See **Figure 2**.

Do not remove adhesive backing from height decal (#26) yet. Carefully place height decal on backside of steel actuator and line up the 10 ft mark on the tape with the 10 ft mark on the height decal.
