SAFETY CAGE SPECIFICATIONS

SAFETY CAGE™

SAFETY CAGE | TYPE IA 300 LBS + IAA 375 LBS | OSHA + ANSI COMPLIANT

Little Giant
Ladder Systems

PRODUCT DESCRIPTION

If you can carry a scissor lift up a flight of stairs, more power to you. Otherwise, the Little Giant® Safety Cage™ is the ultimate portable platform: no tie-off requirement, light enough to work on weight-limited terrain and now with stabilizing outriggers and weight-sensitive caster wheels.

2FT 4FT 6FT 8FT 10FT

PORTABLE, AFFORDABLE LIFT OPTION ENCLOSED SAFETY CAGE

1. FULLY ENCLOSED PLATFORM

With a wraparound rail and toe kick, the Safety Cage 2.0 eliminates tie-off requirements while still allowing 360° of work freedom.

2. NON-CONDUCTIVE FIBERGLASS

Our lightweight fiberglass increases visibility and lets you work safely around electricity.

3. DEPLOYABLE OUTRIGGERS

Outriggers help provide additional side-tip stability. The Safety Cage passes all ANSI tests for stability without outriggers deployed.

4. GROUND CUE®

Your ankles can rest easy. The Ground Cue makes an audible and tactile “click,” letting you know it’s safe to step off the ladder. No more missing the final step.

5. WEIGHT-SENSITIVE CASTER WHEELS

Spring-loaded caster wheels let you reposition the Safety Cage when it isn’t loaded. Just step off to move it, step on to secure it and step up to get stuff done.

 NON-CONDUCTIVE FIBERGLASS
