POWERPIPE X SERIES

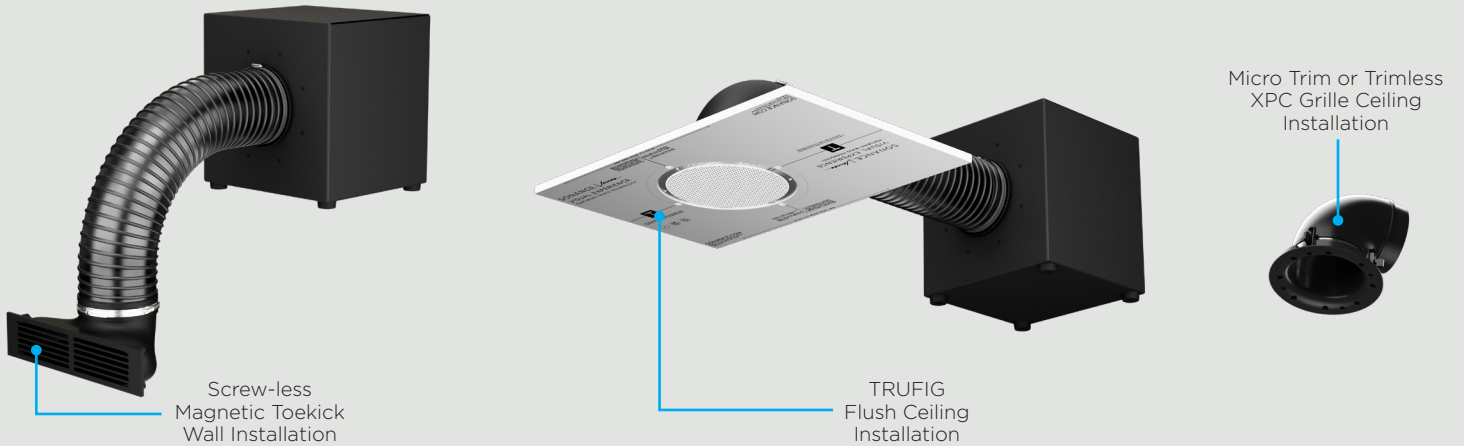

PPX8-M | PPX10-M | PPX12-M | PPX15-M

SOLD AS EACH

James PowerPipe X Series Marine subwoofers redefine what's possible with architectural hidden bass. Designed to disappear within ceilings, deep wall cavities, or cabinetry, PPX Marine eliminates the traditional trade off between performance and aesthetics. It delivers powerful, precise bass from installations that remain completely invisible, whether indoor or outdoor, at home, or at sea.

## KEY FEATURES

James PowerPipe X Series Marine offers advanced bass performance in a ported subwoofer design for indoor and outdoor environments, available in four performance levels: 8", 10", 12", and 15". The system installs within ceiling, wall, and cabinet spaces with the port opening into the listening area for minimal visual impact. Installation flexibility extends further with accessory options including toekick, micro-trim, trimless, and flush mounted grille configurations.

## FEATURES AND BENEFITS

**Four Sizes:** PPX8-M, PPX10-M, PPX12-M, and PPX15-M models for scalable bass solutions

**Ported Cabinet Design:** Provides deep, rich bass in a compact form factor

**Applications:** Behind deep wall cavities, ceilings, or inside cabinets

**Variety of Finishes:** Screw-less magnetic Toekick, XPC micro trim or trim-less Grille, or TRUFIG flush mounted XPC grille blend seamlessly into any design
