

7370 Series

Multi-point Locking System

7370 series | multi-point locking system

a windstorm solution engineered to save lives

Yale® 7370 series is a three-point auto deadlocking system developed to help protect lives while primarily securing the community shelter window openings. Extra heavy-duty steel components firmly fasten the shutter to the frame - at top, bottom and center latch points - reinforcing the opening to endure severe wind speeds and flying debris.

The 7370 is fully integrated - part of a complete ASSA ABLOY tornado and hurricane resistant solution with CECO StormPro® 361, CURRIES StormPro® 361 and FLEMING F-5 shutters and McKINNEY® SP hinges.

certifications/compliance

7370 series are UL certified for inswing shutters 1'8"w x 3'0"h min. to 4'0"w x 6'8"h max. to the following guidelines:

Tornado & Hurricane Shelters

- FEMA 361
- ICC 500

Tornado

Hurricane

- ICC 500
- ANSI/BHMA A250.13
- ASTM E330, E1886, E1996
- TAS201, TAS202, TAS203

Hurricane

backset

2-3/4" (70mm) standard only.

bolts

Top Latchbolt: 5/8" (16mm) stainless steel housing. Through-hardened steel latchbolt with 7/8" (22mm) projection fortified with 1/4-20 steel Holo-Krome® fasteners.

Center Deadbolt: One-piece stainless steel with 1" (25mm) projection.

Bottom Bolt: 3/4" (19mm) diameter steel with 3/4" (19mm) projection and 1/8" (3mm) steel reinforcement plate.

cylinder

1-1/8" (29mm) brass, 6-pin, PARA keyway, keyed random cylinder with two nickel silver keys furnished standard. Optional cylinders available. See page 7-8.

fronts

Top: 1/8" (3mm) thick, through-hardened steel.

Center: 1-1/8" x 4-7/8" x 3/16" (29mm x 124mm x 5mm) thick stainless steel, one piece.

handing

Handing must be specified (RH, LH, RHR or LHR).

strikes

Center: 1/4" (6mm) thick, stainless steel.

Bottom: Brass with 1/4-20 Holo-Krome® fasteners.

shutter thickness

Standard for shutters 1-3/4" (44mm).

shutter height

The 7370 series are standard for window storm shutter applications 1'8"w x 3'0"h to 4'0"w x 6'8"h. See page 6 for more information. For door applications 6'8" to 8'0" height, refer to 7380F series catalog.

3. Trims are plated to simulate stainless steel

 Finish available with MicroShield® antimicrobial coating, additional finishes by special application.

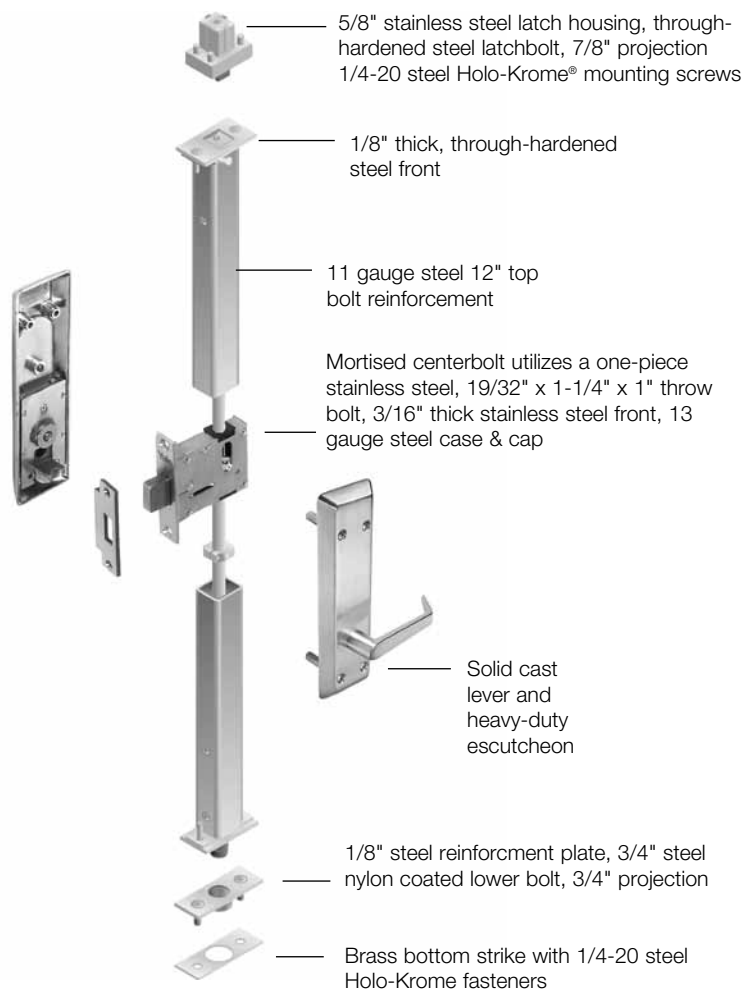

Consult factory for availability.

7370 series | multi-point locking system

features and applications

applications

This device is ideal for inswing window storm shutters in Community Shelters and Safe Rooms, Corporate Campuses, Schools, Healthcare Facilities and Government Facilities.

operation

The 7370 features concealed vertical rods with a top latchbolt and bottom deadbolt which are complemented by an automatically projecting deadbolt at the center of the shutter. Operating the trim retracts the bolts simultaneously. Once retracted the bolts are held in position as the shutter swings. When the shutter is closed, the hold back feature of the device engages the frame and all bolts project simultaneously.

additional features

- Solid cast levers
- Heavy-duty escutcheon
- Through-bolted on shutter for solid attachment
- Extra heavy-duty steel components automatically secure the shutter to the frame at top, bottom and center locations.
- All multi-points are activated automatically when the shutter is closed
- Center bolt and trim height location are set during installation allowing them to always remain in the center of the shutter, regardless of application and shutter height.

microshield®

7370 series multi-point locks are available with *MicroShield* antimicrobial coating. *MicroShield* is a revolutionary hardware finish coating, using a silver ion based technology, which inhibits the growth of bacteria, algae, yeast, fungus, mold and mildew. *MicroShield* is non-toxic and lasts for the lifetime of the finish to which it is applied. To order, suffix option code "YMS".

Note: *MicroShield* coating may vary finish color from architectural standards. *MicroShield* is not intended as a substitute for traditional infection control programs such as hand hygiene or use of disinfectants. Coated products must still be cleaned to insure the surfaces will be free of destructive microbes. Yale makes no representations or warranties, express or implied, as to the efficacy of *MicroShield*.

warranty

The 7370 series multi-point lock carries a 7-year warranty.

Refer to Yale® KeyMark® and/or Cylinders and Keys Catalog sections for all details and how-to-order examples.

Yale® KeyMark®

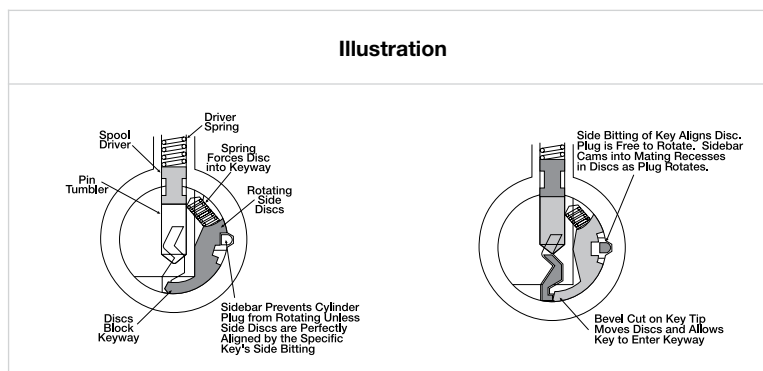

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

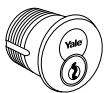

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

suggested specification

Multi-Point Auto Deadlocking Devices shall be 7370 Series as supplied by Yale Locks & Hardware.

Multi-point auto deadlocking devices are engineered for use on inswing shutter applications at hurricane and tornado safe shelter room locations. Concealed, fortified steel construction secures the door to the frame at top, bottom and center positions. All three locking points shall be automatically activated when the device is closed and retracted with one single motion upon exiting.

Multi-point auto deadlock shall be part of an integrated door, frame and hardware assembly UL certified to FEMA 361, ICC 500, ANSI/BHMA A250.13, ASTM E330, E1886, E1996, TAS201, TAS202, and TAS203 for inswing applications.

Latchbolts shall be constructed as follows:

- Mortised Centerbolt:
 - Single piece, 13 gauge chrome plated steel lock case with 3/16" thick stainless steel front.
 - Stainless steel, 1" throw deadbolt.
 - 2-3/4" backset standard with 1/4" stainless steel centerbolt strike.

- Top Latch:
 - Through-hardened steel latchbolt with 7/8" projection
 - 1/8" steel latchbolt front
 - 5/8" stainless steel latch housing secured with 1/4-20 Holo-Krome® fasteners.
- Bottom Bolt:
 - 3/4" diameter steel nylon coated bolt with 3/4" projection and 1/8" steel reinforcement plate
 - Brass strike housing secured with 1/4-20 Holo-Krome® fasteners.

Devices shall be provided with heavy-duty escutcheon trim and solid cast levers matching the design style and architectural finishes as the balance of the locksets and latches specified.

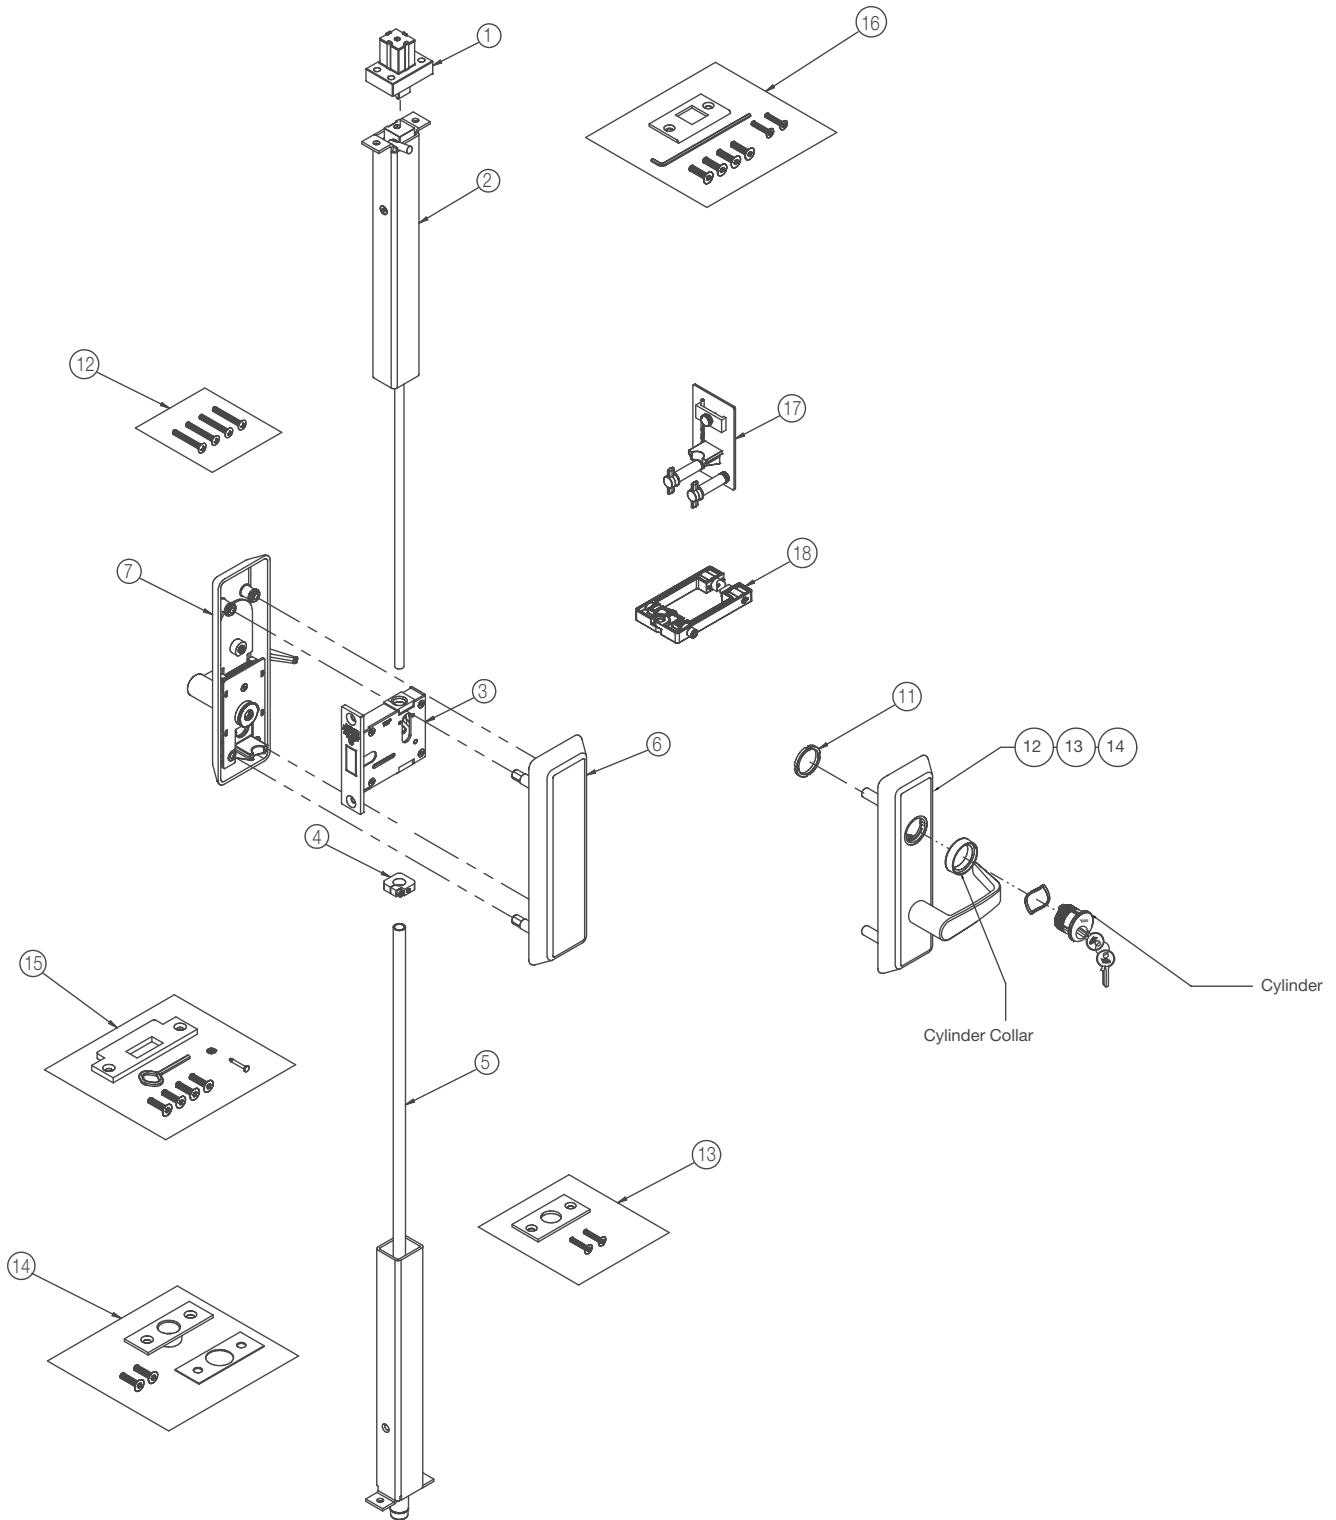

Inswinging storm shutters shall be furnished as a complete door, frame, and hardware assembly for openings measuring from 1'8" x 3'0" minimum to 4'0" x 6'8" maximum.

All multi-point auto deadlocking devices shall have a seven-year limited warranty.
