Additives (kg)***

Nutritional additives:

Vitamin A: 20500IU, Vitamin D3: 700IU, E1 (Iron): 37mg, E2 (Iodine): 3.7mg, E4 (Copper): 6mg, E5 (Manganese): 48mg, E6 (Zinc): 143mg, E8 (Selenium): 0.06mg.

Preservatives - Antioxidants.

KEY VALUES

per 100 g
as fed

Protein	33g
Fat content	16g
Crude ash	6.7g
Carbohydrate	28.3g
Dietary fibre	10.5g
Omega 6	3.93g
Omega 3	0.68g
EPA+DHA	0.26g
Calcium	1.05g
Phosphorus	0.89g
Sodium	0.9g
Linoleic acid	3.73g
Metabolisable energy**	394.4kcal

*L.I.P. (Low Indigestible Protein): protein selected because of its very high assimilation.

**Calculated according to NRC2006

***NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages

FURTHER INFORMATION

Regular veterinary 'wellness' visits are recommended at all life stages. Rationale includes the occurrence of rapid and often un-noticed health changes. Detection of ill health, weight changes, oral disease etc allows for early intervention and better long-term outcomes.

In addition regular visits allow for more frequent client contact, greater advice and on-going education about preventative health care.****
