PRODUCT DATASHEET

F-217
NA

- F-217 is a three-layer coextruded primary liner consisting of two solid low-density polyethylene (LDPE) surfaces with a closed-cell foamed low-density polyethylene (LDPE) core
- The foamed core provides compression and resilience to provide gasket functionality and the solid surfaces provide a smooth surface for maximum leak resistance and barrier
- Does not promote microbial growth

Product Attributes

- Mechanically strong and stable
- Excellent chemical resistance
- Good compressibility
- Coextruded, not laminated, no adhesive
- Resists discoloration
- Good machinability
- Does not promote microbial growth
- No absorption
- Ideal application and removal torque
- No dusting: foam particles cannot come loose
- Non-toxic and free of odors and taste
- Cost efficient
