

# SENIOR CONSULT STAGE 1

Available in  
100g pouch

- Formulated for cats without obvious signs of ageing. Contains an antioxidant complex (vitamin C, vitamin E, lutein, taurine) that helps neutralise free radicals. Helps maintain kidney function with a moderate phosphorus content. Provides selected proteins that contain branched chain amino acids (for an ageing muscle mass).

- Combination of highly digestible proteins and prebiotics to help support digestive health.

## COMPOSITION

Meat and animal derivatives, cereals, derivatives of vegetable origin, vegetable protein extracts, oils and fats, minerals, yeasts, various sugars, molluscs and crustaceans.

## Additives (kg) \* \*

Nutritional additives:

Vitamin D3: 390IU, E1 (Iron): 3.8mg, E2 (Iodine): 0.1mg, E4 (Copper): 0.7mg, E5 (Manganese): 1.2mg, E6 (Zinc): 11.5mg.

## KEY VALUES

	per 100 g as fed	100 g dry matter
Protein	8.5g	42.5g
Fat content	4g	20g
Carbohydrate	4.4g	22g
NFE	4.6g	23g
Dietary fibre	1.8g	9g
Crude fibre	1.6g	8g
Omega 6	0.66g	3.3g
Omega 3	0.13g	0.7g
EPA+DHA	0.09g	0.5g
Calcium	0.2g	1g
Phosphorus	0.18g	0.9g
Sodium	0.13g	0.7g
Potassium	0.14g	0.7g
Vitamin D3	43IU	215IU
Metabolisable energy*	84kcal	442kcal

\*Calculated according to NRC2006

\*\*NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages

## FURTHER INFORMATION

### What are the consequences of an oxidative stress imbalance?

When there is a balance between free radicals and antioxidant defenses, there is a healthy cellular homeostasis. When there is an imbalance, there is a decrease in physiological function which could lead to cell death or the development of age related pathologies.
