Care and use

Before first use, it is essential to hand-wash the overware thoroughly. This product is designed exclusively for domestic oven use, withstanding temperatures of up to 220 °C/Gas Mark 7. To prevent sticking, lightly coat the inner surface of the overware with grease. For optimal longevity, it is advisable to use silicone, wooden, or nylon utensils, while avoiding metal utensils. Take care not to overheat the overware and never leave it unattended during use. When it comes to cleaning, always allow the overware to cool before proceeding, as it is not suitable for the dishwasher. Hand-wash with a mild detergent and a non-abrasive sponge, rinse, and ensure it is thoroughly dried, taking care not to store it while still wet. Always utilise heat-resistant oven gloves when handling the overware, and never subject hot items to cold liquids, as this could cause damage. Should you notice any signs of damage to the overware, dispose of it with caution.
