## **Care and use**

Please retain these instructions for future reference. Before first use, hand-wash the cookware thoroughly. The cookware is suitable for use on hobs only, including induction hobs. For optimum energy efficiency, it is important to position the cookware on hob rings that match the size of its base. Ensure that flames do not overlap the sides or handles. To prolong the life of the cookware, utilise silicone, wooden, or nylon utensils. Avoid overheating or allowing the cookware to boil dry, and never leave it unattended while in use. Be aware that the non-stick coating may discolour over time, but this will not affect its functionality. To prevent damage to ceramic hobs, always lift the cookware rather than dragging it across the surface. Since screws may loosen over time, remember to retighten them carefully with a screwdriver if necessary. When cleaning and storing, always allow the cookware to cool before cleaning. It is safe to use in the dishwasher with mild detergents; alternatively, you can hand-wash it with a mild detergent and a non-abrasive sponge, then rinse and dry thoroughly. Avoid storing cookware while it is wet. As a precaution, always use heat-resistant oven gloves when handling the cookware and never expose hot cookware to cold liquids. If there are any signs of damage, please dispose of the cookware safely.
