

## THE BATTERY

1. The battery is the power source for the system.

2. It provides the energy to start the engine.

3. It powers the electrical system when the engine is off.

4. It is located in the engine compartment.

5. It is connected to the engine and the electrical system.

6. It is a lead-acid battery.

7. It has six cells.

8. Each cell contains lead and lead dioxide plates.

9. The electrolyte is a mixture of sulfuric acid and water.

10. The battery is sealed to prevent leakage.

11. It is designed to last for several years.

12. It should be checked regularly for fluid level.

13. It should be kept clean and free of corrosion.

14. It should be replaced when it is no longer able to hold a charge.

15. It is an important component of the vehicle's electrical system.

16. It is essential for the proper operation of the engine and electrical system.

17. It is a critical part of the vehicle's safety system.

18. It is a key component of the vehicle's performance.

19. It is a vital part of the vehicle's reliability.

20. It is a crucial element of the vehicle's overall health.

21. It is a fundamental part of the vehicle's maintenance.

22. It is a key factor in the vehicle's longevity.

23. It is an essential part of the vehicle's safety.

24. It is a critical component of the vehicle's performance.

25. It is a vital part of the vehicle's reliability.

26. It is a key element of the vehicle's overall health.

27. It is a fundamental part of the vehicle's maintenance.

28. It is a key factor in the vehicle's longevity.

29. It is an essential part of the vehicle's safety.

30. It is a critical component of the vehicle's performance.

## DISASSEMBLY

Part No.	Description	QTY	Notes
1	Battery	1	
2	Terminal Post	2	
3	Terminal Cable	2	
4	Terminal Connector	2	
5	Terminal Nut	2	
6	Terminal Washer	2	

1. Disconnect the battery from the electrical system.

2. Remove the terminal posts and cables.

3. Disconnect the battery from the vehicle.

4. Remove the battery from the engine compartment.

5. Dispose of the battery properly.

6. Reinstall the battery when it is replaced.

7. Reconnect the terminal posts and cables.

8. Reconnect the battery to the electrical system.

9. Test the battery to ensure it is properly installed.

10. Check the battery fluid level and top up if necessary.
