EMB II SERIES

**EMB10-BP | EMB12-BP**

SOLD AS EACH

One of many available options in the EMB II Series Subwoofer line-up features a contemporary, non-obtrusive cabinet design. Built from solid aircraft grade aluminum, the craftsmanship of this compact subwoofer exudes luxury and performance. The unique bandpass (BP) design features a front "Acoustic Energy Director" which allows in-cabinet installation, venting out the toekick or cabinet side. Internally, the EMB10-BP utilizes our "Energy Multiplying Bandpass" technology to obtain high output and low distortion from a compact enclosure. The cabinet features a 10" woofer and a pneumatically phase coupled passive radiator, both with aluminum cones and rubber surrounds.

## KEY FEATURES

The EMB10-BP subwoofer has been tuned to perform all the way down to 22Hz. We recommend pairing it with our M1000 Class D Amplifier which provides 1000 watts of clean power and features a full DSP digital processor. You can power a total of one EMB10-BP Subwoofer with a single M1000 Amplifier.

## FEATURES AND BENEFITS

- Sturdy aluminum cabinet design
- 10" or 12" subwoofer models
- Can be ordered in low impedance or 70V
- Passive subwoofer (requires amplification)
- TAA Compliant
