Laser-Etched Fiberglass Fish Tapes

Klein Tools®, the **first** to introduce **laser-etched** steel fish tapes into the market, is now the first to offer this **exclusive** technology on **fiberglass fish tapes**.

KLEIN TOOLS®

Introducing the First Laser-Etched Fiberglass Fish Tapes

NON-CONDUCTIVE

PERMANENT 1' MARKINGS

DURABLE LEADER

The Advantages of Laser-Etched Markings

- Laser-etched in 1' increments allowing you to more accurately measure the depth of conduit runs.
- Descending markings let you know right away how much tape is left to pay out.
- Laser-etched markings are permanent. They won't rub or scratch off.

Laser-etched markings are also available on Klein® Steel Fish Tapes.

KLEIN TOOLS®

More Innovative Fish Tape Features from Klein Tools®

The unique sloped handle optimizes the position of your hand for quick hand-over-hand rewinds and allows a more level payout of tape on the backswing while feeding conduit

Durable 7" leader helps push through crowded conduit

Polypropylene case and handle are shock and impact resistant

13" case diameter allows 15% faster retraction in a single revolution than similar sized 12" tapes (Cat. No. 56014 has a 17" case to reel in 10% more tape vs. competitors)

Lightweight fiberglass tape resists harsh elements and is strength rated up to 500 pulling pounds

Raised fingergrips help transfer the winding power from your hands to the case
