PROFESSIONAL LIGHTING SOLUTIONS

INDOOR & OUTDOOR

KICHLER

All the support you need.

From corridors to common areas, you need light fixtures you can trust; fixtures that stand up to time, traffic and everyday wear and tear. We are committed to supporting your project's success every step of the way—from localized service to inventory and on-time delivery.

Navigating the Catalog

Search by Category

The Professional Lighting Solutions Catalog presents select Kichler® and élan® fixtures by product category. From Indoor Ceiling and Wall fixtures like Downlights, Pendants, and Sconces, to LED Tape, Ceiling Fans and Outdoor product, the pages that follow are designed to help narrow your search to exactly what you need.

Want full lighting collections for room-to-room coordination?

A sampling of lighting collections can be found on pages 88 – 111.

Locate LED

You will find integrated LED fixtures at the beginning of each product category. Many of these fixtures were designed for 24/7-use and are in compliance with the latest Energy Star® and Title 24 standards.

This catalog also presents a broad selection of our top, tried-and-true incandescent and fluorescent fixtures—featured just after our LED options in each product category.

Additional LED Options

We offer a selection of fixtures that come packaged with compatible LED bulbs included. Bundled together, the Product + Bulbs are Energy Star® rated.

These LED options are denoted with “L18” in the model number, and typically appear just after the integrated LED options in each section.

Symbol Guide

FIXTURE

-  Damp
-  Wet
-  CLIMATES™
-  Mounts Up or Down
-  Mounts Horizontal or Vertical
-  Mount Ceiling or Wall
-  Dark Sky Compliant
-  2019 Title 24, Part 6 is a document that contains the California Building Energy Efficiency Standards for Residential and Nonresidential Buildings as regulated by the California Energy Commission. Products marked with this logo and labeled as JA8-2019 or JA8-2019-E have been found to meet the requirements stated in 2019 Title 24, Part 6. For more information, visit www.energy.ca.gov/title24.
-  ADA Compliant
-  DC Motor

LIGHT SOURCE

-  Dimmable
-  Integrated LED
-  LED Energy Efficient Bulb Included
-  Energy Star
-  When electrical connection is made inside the fixture, supply wire must be rated at least 75° C. When electrical connection is made in an outlet box, supply wire must be rated at least 60° C.
-  Fixture requires supply wire rated for at least 75° C.
-  Fixture requires supply wire rated for at least 90° C.

Lighting Solutions For Work, Dine, Play & Stay

For more than 80 years, we've built a reputation as a leader in designing, manufacturing, and standing behind all types of lighting fixtures, including fixtures for:

Quality Fixtures and So Much More

VARIETY

Whether you need volume and variety for a multi-family structure, or style and efficiency for the high-use needs of a hotel or restaurant, we offer solutions that perform through it all. Our integrated LED fixtures are designed for 24/7 operation and feature dependable materials like rust-resistant cast aluminum housings, durable acrylic or polycarbonate diffusers, and sturdy powder coated finishes.

Integrated LED

High-quality integrated LED fixtures that have been tested and re-tested to ensure they will withstand the test of time.

Energy Star Rated

Products designed for Energy Star Certification and T24 ratings to help you earn rebates and LEED points as well as keep energy costs in check.

Universal Voltage

New opportunities for projects requiring universal voltage (120V-277V) with select sconces, vanity or outdoor fixtures.

Commercial Grade

Commercial-grade landscape products that are DLC qualified (see page 200 for our C-series fixtures).

Light Output Options

Options to suit a variety of kelvin, CRI and lumen output requirements.

For more information on Energy Star, Title 24, DLC and more, see pages 206 – 207.

AVAILABILITY

With over 1 million square feet dedicated to distribution, we are well stocked with the products you'll use most:

Quick Shipping

We're ready to accommodate your timetable - with inventory available for quick ship needs, or staggered shipments for large-scale projects.

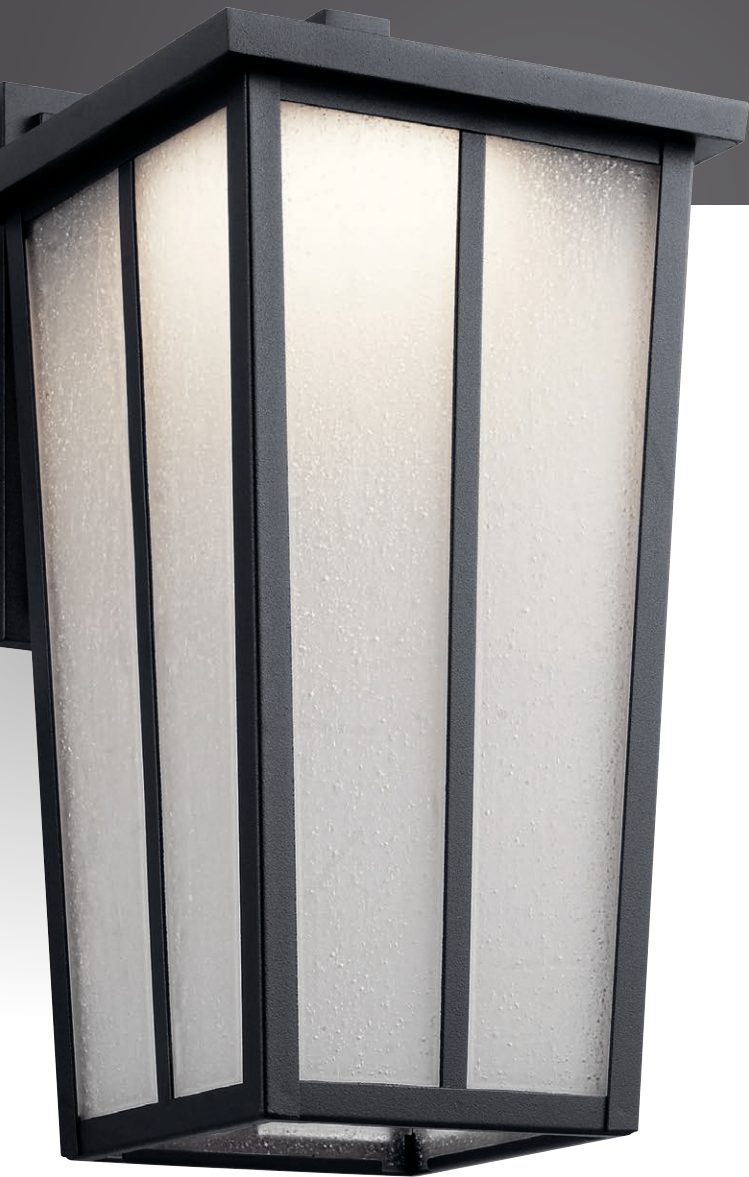

Order Accuracy

Our orders ship with 99.85% accuracy and 95%+ fill rate.

Strategically Located

Our distribution centers are strategically located across the country to help expedite shipping and keep costs in check.

SUPPORT

Whether in the field, over the phone, or online, we offer world-class customer care and support, including:

Call Center

Domestically based call center

In-Field Representatives

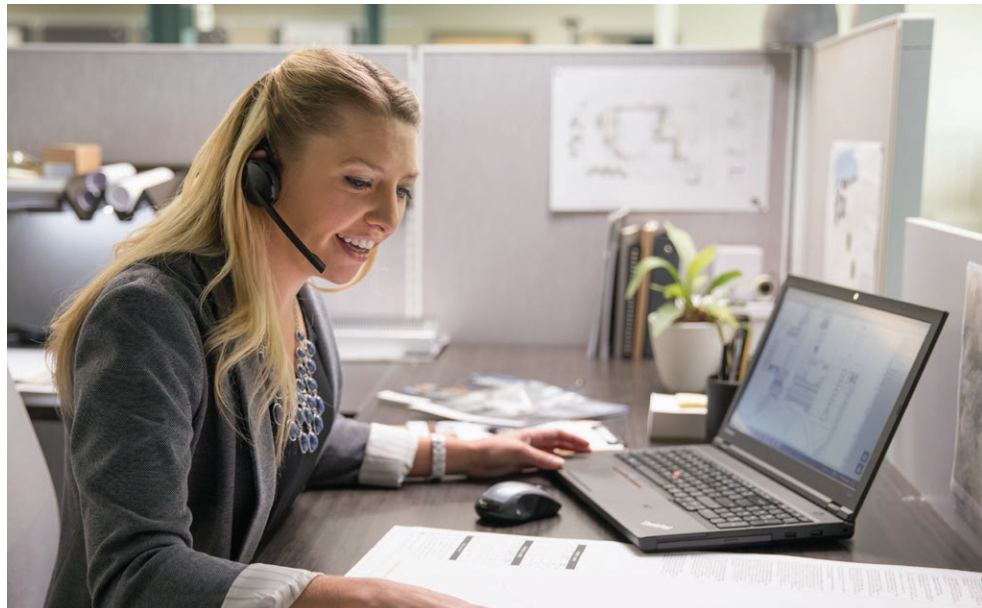

Access to in-field representatives for local, personalized attention and service

Web-Based Access

Web-based access to IES files, videos, and more

FREE Layout Design & Tech Support

Technical support from our certified expert Advanced Product Solutions, Layout (APS) team

Advanced Product Solutions (APS) & Layout

FREE layout and design services – and so much more

From answering questions to creating detailed landscape layouts to delivering a full bill of materials (BOM) – our Advanced Product Solutions, Layout Team (APS) is your link to getting the job done. This free service takes the guesswork out of any lighting need you have: determining the scope of materials required, recommending dimmers, and even creating a full landscape wiring and product layout.

Layout Design Services

Get to solutions faster and increase sales.

Given the many complexities of a landscape lighting system, our APS team takes the guesswork out of proper placement, wiring, and transformers for you.

Here's how our APS Layout Services Works

1. Email APS at layouts@kichler.com with a completed design request form (available at Kichler.com/APS) and any drawings or pictures related to your job. If possible, provide one or two photos showing details of the house, landscaping, trees' height, and any other aspects of the area being lit.
2. Next, the APS team will create a bill of materials (BOM) and a finished layout

Advanced Technical Support

No question is too complex.

Installation issue? Building code question? Regulatory stumper? If you've got challenging questions on indoor or outdoor lighting, ceiling fans, landscape or lighting systems - we have you covered. Our APS Technical Support Team received additional classroom and in-field training on all Kichler® products, so you can get your question answered quickly.

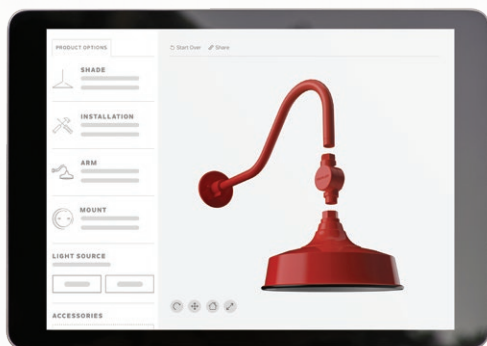

To take advantage of this free service, call our dedicated APS line at **844-KICHLER (844-542-4537)** or email techsupport@kichler.com.

CUSTOMIZABLE RLM

Design your way to endless fixture combinations.

With our Customizable RLM, you can pick your shade style, then your arm, stem, or post based on your mounting location, and top it off with an accessory. The best part, our online configuration tool allows you to see your custom fixture creation – leading to purchase confidence.

Start building at [Kichler.com/RLM](https://www.kichler.com/RLM)

How it Works

1

SELECT YOUR SHADE

There are style options for every look! Choose from angle, warehouse, deep bowl or shallow shades in a variety of sizes and finishes to match your specific preferences.

2

FORM THE FIXTURE

Different arms and stems are available in multiple lengths and finishes to get the exact look you want. Installing on a ceiling, wall or from a post has never been more customizable.

3

ADD ACCESSORIES

Try on a jelly jar, swivel or cage to give your fixture that extra flair. Going for a simpler look? Not a problem—accessories are optional, so you can design it just the way you want.

4

REQUEST MORE INFORMATION

With every piece in place, simply submit to register the fixture with us and receive a smart part number. Be sure to connect with us to help finalize the details of your new customer creation.

With RLM, you also get fixture quality.

The components are comprised of a thick gauge, UV-protected, powder-coated aluminum to maintain their stature – covered by a 5-year limited warranty.

White Inner Coating

The inner coating promotes greater light reflection from the shade.

Black Trim Ring

The trim not only offers decorative flair but serves as a sealant over the line which the outer finish and the inner coating meet.

With the Online Configuration Tool, you can compose your fixture, save it, edit it, and even share with interested parties. To see your ideal combination come to life visit us at [Kichler.com/RLM](https://www.kichler.com/RLM)

INDOOR LIGHTING

In a professional environment, the right ceiling or wall lighting should complement the functional needs of the space. For instance, broad, bright ceiling fixtures work to increase productivity in an office. Staggered sconces along a corridor offer tenants a sense of security in finding their way. A pattern of downlights around the perimeter of any room offers a complete corner-to-corner lighting effect for full-room coverage. When it comes to finding the right light for your application, our products deliver the results you are looking for.

White | Polycarbonate
(1), 12.5W, 850lm, 3000K, 90 CRI, 68 LPW
6.5"W x 1.25"H, | .5"H from Ceiling

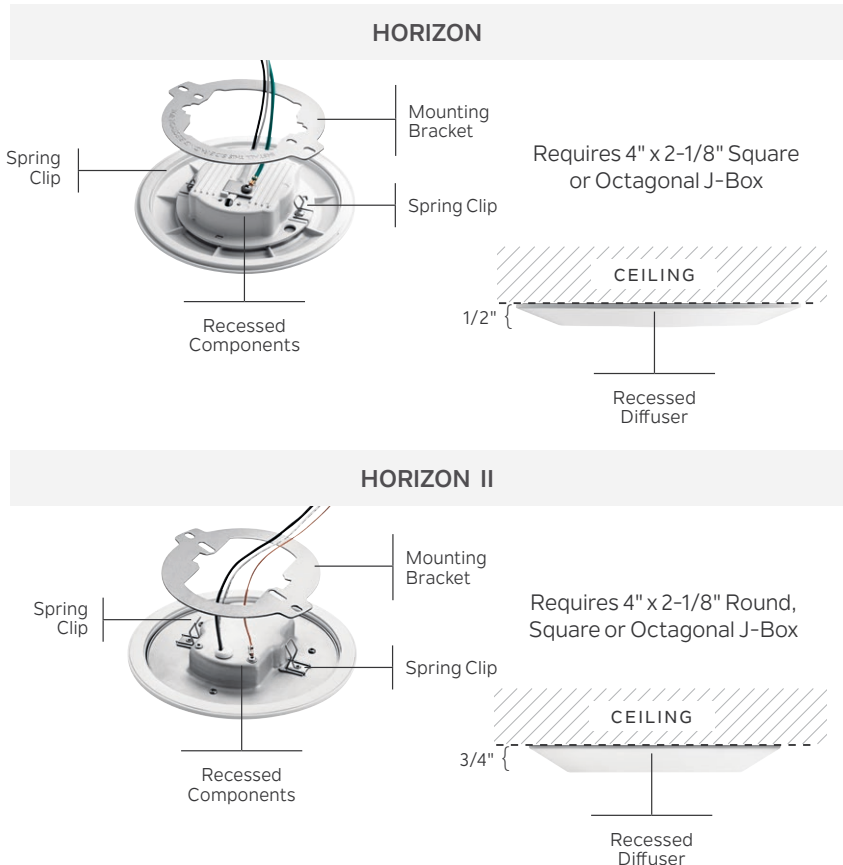

INSTALL TIP

Horizon fixtures come with a mounting plate – simply affix the plate to your J-box first, wire, and then snap the fixture into the plate and you're done!

Horizon LED Downlights

- Ideal for new construction when specified with a 4" wide x 2-1/8" deep junction box (J-box shape varies per item)
- Offers the sleek, hidden appeal of a recessed fixture with its slender profile
- Well-dispersed, ambient lighting
- Single fixture to order, track and install

INSTALL TIP

Tight fit behind your ceiling? Air ducts in your way of installing a light where you need it? Not anymore with our DtC Slim Downlight.

No need for a Can or Junction box, just cut your installation hole and let the spring clips do the work to snap the fixture in place.

Cord and box included with all DtC fixtures

Our lighting exceeds the standards for efficiency, reliability and beauty.

- Long-life light emitting diodes (LED) provide approx. 40,000-hour life span to L70 (70% initial lumens) – about 5 years of standard operation
- True optics: pure white light and controlled beam spread with no fade or drop off of light
- High Color Rendering Index (CRI)
- Standard installation

CABINET LIGHTING

Our cabinet lighting provides useful illumination for everyday chores and bring depth to a room, making it feel larger. Plus, these inconspicuous lights help highlight decorative items, enhance architectural details, and provide soft lighting and safe navigation during the evening hours.

LED.....	114
Fluorescent	117

4U Series – LED

Quality and value lighting for any application.

A low-profile design, durable finish and gently diffused light output make these LED fixtures a true value—ideal for a variety of applications, from single-family homes to multi-unit structures.

JAB-2019

6U Series – LED

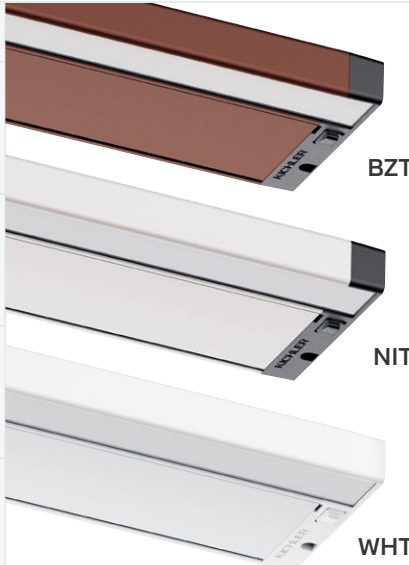

Two-in-one selectable color temperature to customize any installation.

Take the guesswork out of choosing the right lighting: the 6U Series LED allows you to choose a warm or pure white light with the flip of a switch. You get variety and customization that can change easily to enhance your decor in different ways throughout the day. It's a beautiful end effect that works with a variety of countertop and cabinet paint colors.

4U & 6U Series LED – Accessories

Link with ease.

Our 4U and 6U Series LED accessories are available in an array of durable cables and connectors to create an interconnected, evenly powered under cabinet system design.

Under Cabinet Accessories (optional)			
	Accessories	Compatible Fixtures	
Cables & Connectors	10571 BK, WH 9" interconnect cable	6U & 4U LED	
	10572 BK, WH 14" interconnect cable	6U & 4U LED	
	10573 BK, WH 21" interconnect cable	6U & 4U LED	
	10570 BK, WH Wire module 7.75" L x 2.625" W x 1" H	6U & 4U LED	
	10588 SI Duplex BX cable connector	6U, 4U LED & Fluorescent	
	10589 SI (included with fixture) Connector for NM & BX cable	6U, 4U LED & Fluorescent	
	6UCORD BK, WH 60" under cabinet interconnect prong cord	6U & 4U LED	

Installation

Options that add versatility.

Our 4U and 6U LED under cabinet fixtures can be installed two different ways: either direct wired for installation closer to the wall, or linked together using accessories for installation near the front face of cabinets.

Back of Cabinet Installation – Direct wire connect.

Front Mount – Use wire module and interconnect cable.

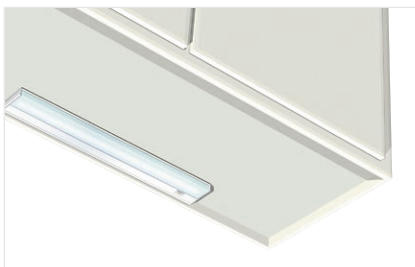

Fluorescent – 120V

Convenience and value come together.

Our direct wire fluorescent fixtures combine the energy efficiency of fluorescent bulbs with the convenience of traditional incandescent fixtures.

LED TAPE & ACCENT

Versatile LED Tape and Accent lighting brings illumination to small or unique spaces. While LED Tape is ideal for lining a cove ceiling or shelving, LED Accent Discs are perfect for illuminating architectural niches. Plus, low voltage fixtures can also be used in the same design, with the same voltage. So you can mix and match LED Accent Discs, and LED Tape on the same power supply—saving you time and materials on the job.

Tape Light - 12V, 24V	120
Accent Discs - 12V, 24V.....	124
LED Driver + Dimmer	125
Power Supplies.....	126
Low Voltage Wire	127
TE Series Channels	128
Tracks & End Caps	130
Additional Accessories	130

4T Series, 12V LED – Dry

A low voltage design and the ability to cut to 2" increments makes the 4T Series ideal for short runs and smaller spaces, like lining shelves or cabinets.

Build your lighting system

The ability to build a lighting system is one of the many things that makes low-voltage LED tape and accent lighting so versatile. With the right components, you can install lighting just about anywhere your supply wire can take you, including coves, toe kicks, shelving, or drawers. To build your system, you'll need:

Product + Power Supply + Supply Wire, Leads and Interconnects + Accessories = Light

<p>1 Select your Product</p>  <p>Page 120</p>	+	<p>2 Select your Power Supply</p>  <p>Page 126</p>	+	<p>3 Interconnects</p>  <p>Pages 121</p>	+	<p>4 Select Wire</p>  <p>Pages 127</p>	+	<p>5 Utilize Accessories</p>  <p>Page 128-130</p>

8T Series, 24V LED

The 8T Series of Commercial Grade LED Tape Light is designed to integrate with our patented connector accessory system to simplify and speed up the installation of even the most complicated tape light design configurations. The tape features a flexible 2-layer circuit board that supports increased run lengths with less voltage drop. It then offers a push-in connector base every four inches with cut marks to either side. Eight unique connector accessories can install straight on (0-degrees) or rotated (180-degrees) – regardless of tape direction or polarity – and simply push into place.

Commercial grade, 24/7 operation, and when paired with channels, provides countless design possibilities

- Available in Standard, High, and Ultra High output in 5 color temperatures: 2200K, 2700K, 3000K, 4000K, and 5000K
- An assortment of strips and rolls, ranging from 4" to 100'
- Compatible with 8 unique connector accessories that can decrease installation time in any design configuration
- Flexible 2-layer circuit board for extended run length: 67ft Standard, 33ft High, 10ft Ultra High
- Field-cutttable on marked cut lines on either side of the connector
- Edge-to-edge 3M™ adhesive

8T SERIES CONNECTOR ACCESSORIES (Patented)

A robust pluggable tape connector accessory system

- Push in, reliable connection
- Universal polarity at the connector for ease of installation
- Provides 0-180 degree connection
- Tape-to-wire connectors allow the installer to utilize their preferred 20-22AWG wire to make custom length supply leads and jumpers
- Flexible connectors allow connections to bend around corners for new unique installation solutions
- Designed to carry the full load of Standard, High and Ultra High tape light outputs.

The ability to build a lighting system is one of the many things that makes low-voltage LED tape and accent lighting so versatile. With the right components, you can install lighting just about anywhere your supply wire can take you, including coves, toe kicks, shelving or drawers. To build your system, you'll need:

Product + Power Supply + Supply Wire + Accessories = Light

LED Driver + Dimmer

Our all-in-one LED Driver + Dimmer simplifies your lighting systems installation. By integrating the driver with the dimmer switch, this one product can convert 120V AC to either 12V or 24V DC, as well as dim from 100% to 1%. Simply connect this one device to both your high voltage input and low voltage output, and install with a standard single gang box to the wall – saving time on installation.

		Models and Accessories			
Location Use	Dry Locations Only*				
Available Finish	White (WH)				
Benefits	Product Benefits <ul style="list-style-type: none"> • All-in-one integrated LED Driver + Dimmer switch eliminates switch/driver compatibility issues. • Pre-set dimmer with on/off switch offers excellent dimming performance: 100%-1%. • Manages 120V AC input to control 12V or 24V constant voltage lighting systems. 		Installation Benefits <ul style="list-style-type: none"> • Eliminates the time and guesswork of finding compatible options. • All-in-one product saves time in ordering, tracking, and installing over multiple components. • Installs in a standard single-gang wall box. 		
Compatible Fixtures	4T Series 12V, 4D Series 12V, 6T Series 24V Dry, 6D Series 24V, 8T Series 24V				
Warranty	5-year limited warranty. See Kichler.com/warranty for complete details.

*All Power Supplies are Class 2 and either 12V or 24V DC.

**Compatible dimmers will vary based on selected power supply. For recommended dimmers visit Kichler.com/dimming.

Voltage Drops

For best performance and lumen output, ensure proper wire gauge is installed to compensate for voltage drop of low voltage circuits.

12V Voltage Drop & Wire Length Distance Chart

	5W 0.42A	10W 0.83A	20W 1.67A	30W 2.5A	40W 3.33A	50W 4.17A	60W 5A
18 AWG	65 ft.	32 ft.	16 ft.	10 ft.	8 ft.	6 ft.	5 ft.
16 AWG	100 ft.	50 ft.	25 ft.	16 ft.	12 ft.	10 ft.	8 ft.
14 AWG	160 ft.	79 ft.	39 ft.	26 ft.	20 ft.	16 ft.	13 ft.
12 AWG	240 ft.	120 ft.	59 ft.	39 ft.	30 ft.	24 ft.	20 ft.
10 AWG	392 ft.	196 ft.	98 ft.	65 ft.	49 ft.	39 ft.	32 ft.

1 Determine load size. Let's assume the load is 55W. Round up to the nearest load.

2 Determine distance from power supply to load. Let's assume the distance is 32 ft. Round up to the nearest distance.

3 See the recommended wire gauge to install to eliminate excess voltage drop. Recommended wire gauge is 10AWG.

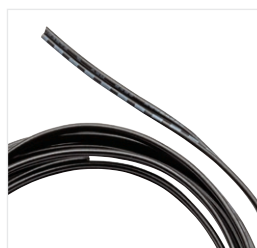

24V Voltage Drop & Wire Length Distance Chart

Low Voltage Wire - Class 2 Rated

The best choice outside of the wall: 24 AWG

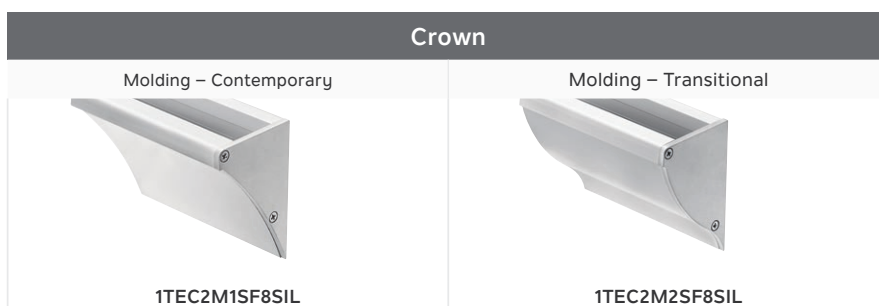

This low voltage wire works perfectly for any Class 2 wiring project, since the 24 AWG wire is durable enough to be soldered when you choose not to use connectors. It's also the best option for our ultra-high output tape.

5W24G250 BK
24 AWG low voltage wire
250'
CL2 rated
Not for in-wall use

TE Series Channels

PRO SERIES – 8ft Length | Components à la carte

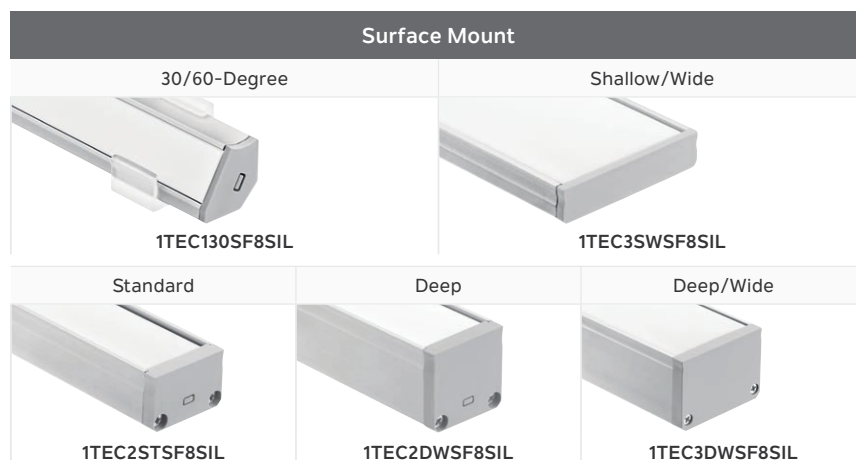

Pro and Enhanced Series Channels and components are ordered à la carte and made to order. Orders require a 6-8 week lead time.

ENHANCED SERIES – 8ft Length | Components à la carte

Surface Mount

These channels install onto a surface to create under-cabinet, shelving, or even step lighting and can also be miter cut and connected to create corners or custom shapes.

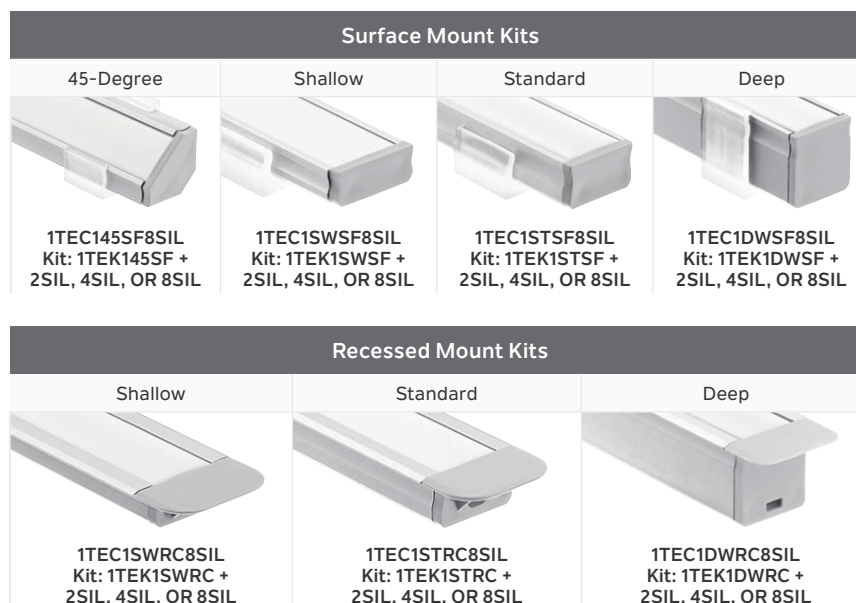

Recessed Mount

By creating space within drywall, shelving or other surfaces, recessed channels can then be inset for a seamless, built-in lighting effect. Miter cut and connect for custom shapes.

STANDARD SERIES – 8ft Length | à la carte 2, 4, & 8ft Kits

We offers aluminum extruded channels to make it easier to design with light.

The Pro Series allows you to integrate light into ceilings, walls and floors and create unique, and often unexpected, lighting effects.

The Enhanced Series may seem like a straightforward collection of channels; however wider widths and varying depths take your lighting from accent to ambient.

The Standard Series lives up to its name for standard accent lighting installations. The series offers an array of ordering options, including kits that come with the lens, mounting clips and end caps. Although the Standard Series is the only group offered in kits, all three series can be ordered à la carte to create your ideal channel assembly.

TE SERIES CHANNELS

- Are designed to hold LED tape light – Standard and High output 8T, 6T and 4T models (tape sold separately).
- Come in varying widths and depths to create a desired end effect.
- Have both Surface and Recessed mount options – look for SF or RC in model number.
- Pair with lenses, end caps, mounting clips, and accessories for a polished look.
- Can be trimmed to unique lengths and shapes.
- Can be paired with the suspension cable (most models) to create a unique pendant.

For inspiration plus coordinating lenses, end caps, mounting clips and accessories, visit Kichler.com/TapeChannels

Tracks & End Caps

Broaden your installation options with track and diffusers that allow you to customize the direction and appearance of your tape light.

Tracks and End Caps			
			Compatible Fixtures
U-Channel Aluminum Track*	10174 BK, WH – 36" 10-pack	0.75" W x 0.5" H Includes 11 end caps Pre-installed screws every 6"	4T Series 12V 6T Series 24V 8T Series 24V

LED STEP & HALL LIGHTING

LED Step and Hall fixtures are the prime example of lighting with purpose. Whether illuminating a corridor or providing visibility to a stairwell, these 120V LED fixtures help guide the way. Available in an array of faceplates and finishes, these step and hall fixtures allow for direct wire into a standard single gang junction box. Providing ease of installation with captive screws and push-in wire connectors.

Designed for ease of installation

Fits in standard single gang junction box.

Push-in wire connectors included.

Installation Features

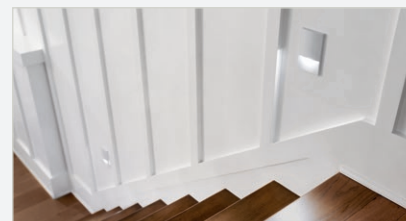

- Fast installation with push-in wire connectors and captive mounting screws
- Snap-off tabs to retrofit into any standard junction box/receptacle
- Integral 120V input driver
- Aluminum housing with die-cast aluminum faceplates
- IC rated
- ETL rated for damp locations
- ADA compliant

Light Features

- Light output: 8-30 lumens, visit Kichler.com for details
- Power consumption: 1 Watt
- Color Rendering Index (CRI): >80
- Correlated Color Temperature (CCT): 3500K +/- 150K
- Balanced lighting – free of shadows, cutoffs and striping

Hall or Wall Installation

Step Installation

CEILING FANS

Perfect for both living and public spaces, our ceiling fans deliver trend-forward designs in motion. From classic to modern and vintage to industrial, we offer an array of styles that provide a welcoming experience.

Ceiling Fans – Accessories

CoolTouch™ Control System – Full Function 371085

- Designed for AC motor fans
- Includes transmitter and canopy-mounted receiver
- Learn mode canopy receiver with **65,000 code settings** included
- 3 forward speeds, reverse and motor off
- Lights on/off with full range dimming or on/off only for fluorescent
- Dims LED light sources
- Down light control: on/off plus full range dimming or on/off only for fluorescent
- Wireless radio frequency operation, radius of 30 feet or less
- Retrofits most pull chain fans
- Replaces any single wall switch or mounts on any flat surface
- Receiver designed for dry locations
- Includes wall bracket and all mounting hardware
- Includes replaceable, long-life lithium batteries
- Includes white, ivory & almond switch and cover plates
- U.S. and Canadian patent pending

CoolTouch™ Control System – Basic 371082

- Designed for AC motor fans
- Includes transmitter and canopy-mounted receiver
- Learn mode canopy receiver with **65,000 code settings** included
- 3 forward speeds and motor off
- Dims LED light sources
- Manual reverse
- Down light control: on/off plus full range dimming or on/off only for fluorescent
- Wireless radio frequency operation, radius of 30 feet or less
- Retrofits most pull chain fans
- Replaces any single wall switch or mounts on any flat surface
- Receiver designed for wet locations
- Includes wall bracket and all mounting hardware
- Includes replaceable, long-life lithium batteries
- Includes white, ivory & almond switch and cover plates
- U.S. and Canadian patent pending

Wall Control System – Full Function 371045 MUL

- Designed for AC Fans
- Includes Transmitter and Canopy mounted receiver
- Learn mode canopy receiver with 65,000 code settings included
- 3 Forward speeds, reverse and motor off
- Lights On/Off with full range dimming; Dims LED
- Includes white, ivory & almond switch and cover plates
- Transmitter to be placed indoors
- Hard wired wall control

Wall Control System – Basic 371042 MUL

- Designed for AC Fans
- Includes Transmitter and Canopy mounted receiver
- Learn mode canopy receiver with 65,000 code settings included
- 3 Forward speeds and motor off
- Manual Reverse
- Lights On/Off with full range dimming; Dims LED
- Includes white, ivory & almond switch and cover plates
- Transmitter to be placed indoors

Our outdoor fixtures are a reliable source of light, style and durability

- Integrated LEDs deliver excellent light distribution and energy savings for 40,000 hours (to L70, or 70% initial lumens)
- Durable materials and finishes, including our CLIMATES™ collections, are quality tested to withstand the elements
- Dark Sky certified options work to accommodate projects in which light pollution is a concern

12V VLO LED Collection

Our Variable Lumen Output (VLO) product line with Lumen Effects System allows landscape contractors to switch between lumen outputs easily within one fixture - giving contractors and installers the design flexibility to adjust on location before or after the initial installation has occurred.

120V LED Lamps

LAMP	BASE / LAMP TYPE	WATTS	KELVIN / LUMENS	BEAM ANGLE/ITEM #	
				25° Spot	40° Flood
	PAR20 Wet Location Ⓜ	7W Compares up to 35W Halogen	3000K – 330 lm	-	18085
			4200K – 350 lm	18083	18086
				25° Spot	40° Flood
	PAR30 Longneck Wet Location Ⓜ	12W Compares up to 50W Halogen	3000K – 610 lm	-	18115
	PAR38 Wet Location Ⓜ	17W Compares up to 75W Halogen	4200K – 900 lm	-	18098

Ⓜ Wet location versions designed and listed for use in an enclosed or open fixture. Using lamp in enclosed fixtures can result in up to 30-40% loss in lumen output based on test data.

Reduce Energy Costs

Kichler Lighting offers many Energy Star® rated fixtures that can also be used to comply with 2019 Title 24, Part 6 High efficacy LED light source requirements.

As legislation changes and evolves, Kichler® makes sure our latest lineup of fixtures offer the features building owners are required to have.

Energy Star®

Energy Star is a U.S. Environmental Protection Agency (EPA) voluntary program designed to help businesses and individuals save money and protect our climate through superior energy efficiency. Energy Star products are independently tested and certified to save energy without sacrificing features or functionality, including light quality or output. Lighting products covered include:

- Residential light fixtures and ceiling fans with light kits
- Commercial accent lights including line-voltage directional track lights
- Commercial downlights: recessed, pendant, surface mount (includes retrofits & excludes troffers or linear forms)
- Commercial under cabinet lighting

www.energystar.gov

Title 24 (T24)

Title 24 Building Energy Efficiency Standards are designed to reduce energy consumption by mandating that commercial building owners and homeowners use only high-efficacy lamps in both indoor and outdoor fixtures installed during new construction or remodels. The legislation has evolved recently to outline several new requirements for these fixtures, including:

- Light sources must offer “low flicker operation” (an LED must flicker less than 30% at frequencies below 200 Hz).
- LED lamps and luminaires must provide an R9 of at least 50.
- The Color Rendering Index must be equal to or greater than 90, assuring it produces strong, vibrant reds.

California is paving the way to reduce its greenhouse gas emissions to 1990 levels by 2020, and many additional municipalities nationwide have adopted these regulations as well. **All Kichler fixtures featuring the T24 logo meet the latest legislation requirements, including those implemented in January 2019 with JA8.**

The DesignLights Consortium (DLC)

The DesignLights Consortium® is a non-profit organization that promotes quality, energy-efficient commercial-sector lighting solutions. The high-performance standards of a DLC qualified product are established in collaboration with its federal, regional, state, utility, and energy efficiency program members, manufacturers, lighting designers, and other industry stakeholders throughout the US and Canada. The goal is to identify quality products and program benefits that advance the industry-wide adoption of energy solutions throughout commercial construction. The DLC reviews:

- Non-residential fixtures not currently covered under the Energy Star program, such as: LED Luminaires like Outdoor Pole, Bollards, Landscape Accent and Flood, Wall Wash and garage canopies.
- Commercial lighting for industry applications like: roadway, parking garages – primarily outdoor, high-voltage applications
- 3rd party data to ensure fixtures meet stringent output, efficacy, CCT, CRI and warranty standards

www.designlights.org

Reduce Energy Costs

Illuminating Engineering Society Of North America (Iesna) Lm-79-2008

IESNA developed a standardized industry test conducted on all LED light fixtures and light sources to provide universally consistent data that is translated for the benefit of end users. The test measures qualities such as lumens, energy consumed, CRI and color temperature – resulting in an IES file/report. It allows for a true comparison of energy efficiency regardless of the light source and serves as the primary source of data when creating Lighting Facts® labels. IES files are then also utilized by the design community to plot accurate light distribution throughout their plans.

www.ies.org

LEED®

The LEED® (Leadership in Energy & Environmental Design) certification program from the U.S. Green Building Council has become the benchmark for architects, real estate professionals, facility managers, engineers, interior designers, landscape architects, construction managers and government officials who want to design, construct and operate more sustainable buildings. The third-party certification process assigns LEED® points for products and processes used that promote green practices related to site development, water savings, energy efficiency, materials selection and indoor environmental quality. There are a limited number of possible points available, with a tiered system that certifies buildings with a Platinum, Gold, Silver or Certified status based on points earned. According to leed.usgbc.org/leed, from 2015-2018 LEED-certified buildings are estimated to generate as much as \$1.2 billion in energy savings and \$715.3 million in maintenance. The right lighting can contribute to earning LEED points in new construction.

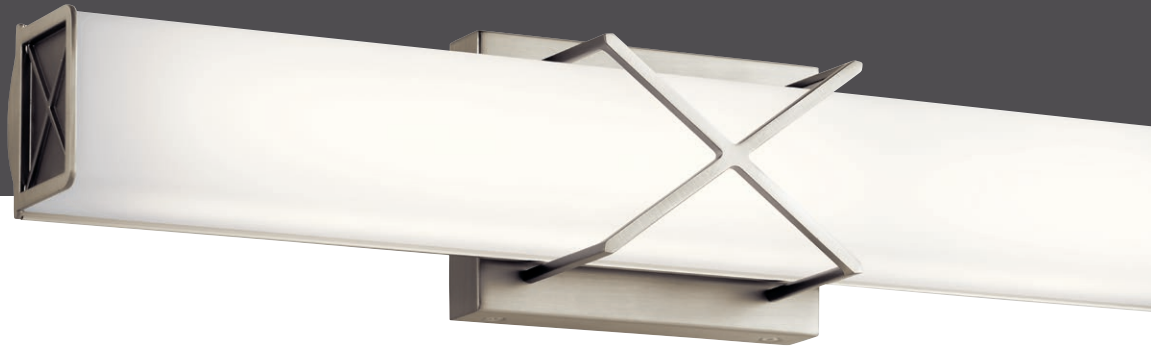

www.USGBC.org/leed

ICC

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets follow the International Codes, or I-Codes, published by ICC. The I-Codes are a complete set of comprehensive, coordinated building safety and fire prevention codes that provide minimum safeguards for people at home, at school and in the workplace. For instance, when a light fixture is to be placed in a ceiling filled with insulation, it requires an insulated contact (IC) rating to assure the fixture can be covered with insulation.

www.iccsafe.org

FCC

Part 15 of the FCC regulations addresses the Radio Frequency (RF) of LED lighting products to ensure that devices do not cause harmful interference to radio-communications services. In most cases, the driver paired with LED lighting devices operates at RF frequencies similar to those used in digital electronic products. LED fixtures are then subject to the “Verification” or “Certification” equipment authorization procedures. The testing limits radiated emission from 30 MHz to 1000 MHz to ensure overall compliance with radiated emissions requirements. Manufacturers are required to design to these standards, as well as keep validated test reports on file. Wireless or “intentional” devices require reporting be submitted through the FCC.

www.fcc.gov

International Dark Sky Association (IDA)

IDA's Fixture Seal of Approval program certifies outdoor lighting fixtures as being Dark Sky Friendly, meaning that they minimize glare while reducing light trespass and sky glow. Dark Sky friendly fixtures are designed to reduce light pollution by directing the light down and out, not up. To earn the seal of approval, products are required to be fully shielded and to minimize the amount of blue light in the nighttime environment.

www.darksky.org

ADA Compliant

The Americans with Disabilities Act is a federal anti-discrimination statute designed to ensure equal access to opportunities and benefits for qualified individuals with disabilities. The act seeks to remove barriers to the enjoyment of programs and employment opportunities, independent living, and economical self-sufficiency enjoyed by those without disabilities. The American with Disabilities Act (ADA) limits wall-mounted luminaires to four inches in depth when located between 27 inches and 84 inches from the finished floor level of walks, halls, corridors, passageways, or aisles. Many Kichler Lighting sconces meet this requirement at any mounting height.

www.ada.gov

Navigating the Light

Color	<p>COLOR CORRELATED TEMPERATURE (CCT)</p> <p>Also referred to as Color Temperature and displayed as Kelvin Temperature</p>	<p>Kelvin Temperature (K) indicates the color of the light source or the color you are getting from an LED fixture</p> <ul style="list-style-type: none"> • 2700K is a warmer light—closer to incandescent • 3000K trends warm, but optically closer to a pure white • 4000K trends cooler, but perceived as a bright white • 5000K is cool, perceived often as having a blue hue
	<p>COLOR RENDERING INDEX (CRI)</p> <p>Particularly of importance indoors where there is less natural light</p>	<p>CRI reflects the color that the light brings out of objects</p> <ul style="list-style-type: none"> • 90+ CRI results in a more vibrant and “true” color • A lower CRI (<80) would make seemingly colorful objects appear dull and unappealing.
Brightness	<p>LUMENS (LM)</p> <p>Reflect the amount of light from a fixture</p>	<ul style="list-style-type: none"> • The higher the lumens, the more light you are getting • Lumens in the lower 100s (<550) typically work best for accent or niche lighting • 550 to 850 lumens give light levels equivalent to traditional 40W or 60W incandescent bulbs respectively, and are ideal for downlighting • 850 to 2000 lumens typically work best in spaces with average ceiling height (9' to 12') • 3000 to 5000 lumens are typically best for larger spaces, vaulted ceilings, and more task driven applications that require significant light
Light Delivery	<p>DELIVERED LUMENS</p>	<p>You may see delivered lumens throughout this catalog as we work diligently to provide that level of data</p> <ul style="list-style-type: none"> • Source lumens = the brightness at the source • Delivered lumens = the brightness recognized closer to eye level, or the level in which the light has the most impact in a space
	<p>BEAM SPREAD</p>	<p>Beam spread is an excellent indicator of how wide the light is being dispersed</p> <ul style="list-style-type: none"> • Lower beam spread (60-80 degrees) is indicative of a thinner stream of light—similar to that of a flash light. This is often preferred for task lighting as it offers a stronger stream of light down to the task at hand. • Higher beam spread (100+) is wider—best suited for ambient or general purpose lighting across a room. The light is dispersed broadly, but has less strength as it goes down.
Efficiency	<p>LUMENS PER WATT (LPW)</p> <p>also referred to as efficacy</p>	<p>LPW reflects how many lumens you get per watt—which is a sign of efficiency. Energy Star® standards for indoor fixtures vary based on size and watt criteria:</p> <ul style="list-style-type: none"> • > 50 LPW for all lamp types below 30 total listed lamp watts • > 60 LPW for all lamp types that are < 24 inches and > 30 total listed lamp watts • > 70 LPW for all lamp types that are > 24 inches and > 30 total listed lamp watts

Bring it all together.

Symbol Guide

FIXTURE

-  Damp
-  Wet
-  CLIMATES™
-  Mounts Up or Down
-  Mounts Horizontal or Vertical
-  Mounts Ceiling or Wall
-  Dark Sky Compliant
-  2019 Title 24, Part 6 is a document that contains the California Building Energy Efficiency Standards for Residential and Nonresidential Buildings as regulated by the California Energy Commission. Products marked with this logo and labeled as JA8-2019 or JA8-2019-E have been found to meet the requirements stated in 2019 Title 24, Part 6. For more information, visit www.energy.ca.gov/title24.
-  ADA Compliant
-  DC Motor

LIGHT SOURCE

-  Dimmable
-  Integrated LED
-  LED Energy Efficient Bulb Included. Option to purchase specific fixtures that come packaged with compatible LED bulbs
-  Energy Star
-  When electrical connection is made inside the fixture, supply wire must be rated at least 75° C. When electrical connection is made in an outlet box, supply wire must be rated at least 60° C
-  Fixture requires supply wire rated for at least 75° C
-  Fixture requires supply wire rated for at least 90° C

- Bulbs not included unless otherwise noted.
- Wattages stated are the maximum allowed; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA Standards for use in U.S.A. and Canada except where noted.
- All chain drop products equipped with at least 72" of chain unless otherwise noted.
- All products featured in the outdoor section are certified and listed to UL/CSA standards for wet location except where noted.
- On some products, in order to accommodate higher-than-normal ceiling height, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants, and other forms of weathering.
- To serve you better, Kichler Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

Consumer Notice

Federal Legislation to phase out 100 watt Incandescent Bulbs started January 2012

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310-2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100 watt bulbs in January 2012 and will end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps and plant lights.

By 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt. Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as LED lamps.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor lantern products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite® lanterns.

Due to environmental conditions such as soil acidity, concrete alkalinity and other corrosive soil and air conditions, we cannot guarantee our direct burial posts.
