Add-Ons

Ring Chime Pro

Hear notifications anywhere in your home when motion is detected. Plus, amplify all your devices and boost your Wi-Fi network to all your Ring Video Doorbells and Security Cams.

Voice Assistant

Enjoy hands-free home monitoring with select Alexa-enabled devices. Hear custom notifications and use two-way talk with audio-only Echo devices, and launch video with Echo Show, Fire TV and Fire Tablets.

Frequently Asked Questions

What is the difference between Indoor Cam and Stick Up Cam?

Indoor Cam is an indoor-only camera that plugs into standard power outlets for nonstop power. Stick Up Cam is a versatile camera that goes anywhere indoors or out. It's weather-resistant and comes in four different power options: battery, plug-in, solar and Power over Ethernet.

What privacy features are included with Indoor Cam?

Indoor Cam allows you to configure your privacy settings depending on your current needs. Toggle motion alerts, motion or audio recording off in the Ring App at any given time. Create a motion schedule to disable motion alerts and recording during the times you're usually home. Use Modes to select a camera state with Disarmed, Home or Away Mode. Additionally, if you have a specific area in your home that you don't want to monitor, define Privacy Zones to blackout that area to control what you want to see or record.

What is Ring Protect?

Ring Protect is a comprehensive optional subscription service that lets you review, share and save every video and photo captured by your Ring Indoor Cam, plus a few extra perks. To compare and learn more about Ring Protect visit <https://ring.com/protect-plans> to choose a plan that works for you.

Do I need Ring Protect to use Indoor Cam?

No. You can still use your camera to watch over your home from anywhere, even without a subscription to Ring Protect. Without Ring Protect, you'll still receive real-time notifications when motion is detected, and you can answer the notifications to see, hear and speak to people in real time from your mobile device. However, without a subscription to Ring Protect, you won't be able to review any videos that you missed in real time, and you won't be able to save your videos or share them with anyone. Visit <https://ring.com/protect-plans> to learn more about Ring Protect and to choose a plan that works for you.
