BY SONANCE

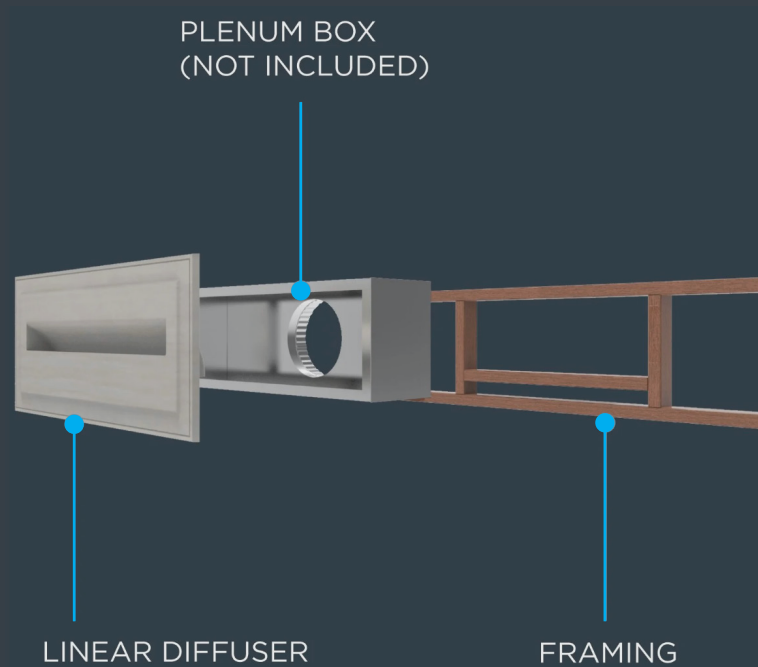

LINEAR DIFFUSER

7" | 12" | 24" | 36" | 48"

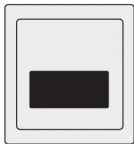

TRUFIG Linear Diffusers use a solid cast design, offering high-performance engineering without sacrificing architectural aesthetics. They are made of glass fiber reinforced gypsum, reducing the risk of cracking from expansion and contraction. The surface can be primed and painted like any other gypsum finish material.

TRUFIG MOUNTING SYSTEM

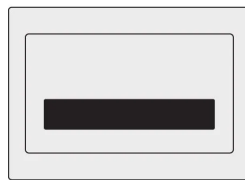

HVAC systems can be vented in beautiful ways to maintain the design and architectural integrity of a space. TRUFIG Linear Diffusers are designed to provide a clean, elegant aesthetic for HVAC venting. They support a variety of surface finishes including gypsum, plaster, wood, and stone.
