

IPOINT DATA SHEET

CONNECT PRO VESA STATION

CONNECT PRO VESA STATION

CONNECT PRO VESA Station combines the charging feature of CONNECT PRO Stations and gives the added security of an integrated lock and 100x100mm or 75x75mm mounting pattern for attaching the VESA Station to your preferred VESA Vehicle mount. Hardwire the CONNECT PRO VESA Station to a vehicle 12V or 24V integrated electrical system for secure holding and charging for iPads used in fleet and first responder vehicles.

CONNECT PRO VESA STATION

The CONNECT PRO VESA Station is engineered for demanding warehouse, medical, and rugged environments, offering a combination of charging functionality and secure mounting. It features an integrated lock and supports both 100x100mm and 75x75mm VESA mounting patterns, allowing for easy attachment to VESA-compatible vehicle mounts. Ideal for fleet and first responder vehicles, this station can be hardwired to a 12V or 24V electrical system for reliable power. In warehouses, it ensures iPads are securely mounted and charged even in tough conditions. In medical settings, it provides a secure, always-ready solution for critical device usage.
