

# TRUFIG

BY SONANCE

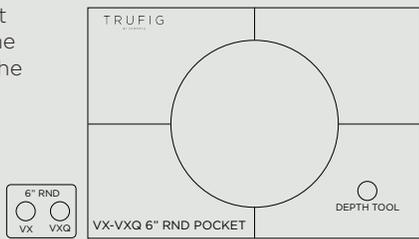

## VISUAL EXPERIENCE SERIES

Sonance is dedicated to delivering solutions to weave music into the fabric of daily life. The right audio is most powerful when it is strategically comfortable to enjoy and meticulously designed to blend into the architecture. These foundational beliefs are what drove the design for Sonance VX series. The first loudspeaker to be engineered by simulation and machine learning, the series features balanced coverage, low distortion, and smooth response for comfortable, natural sound reproduction.

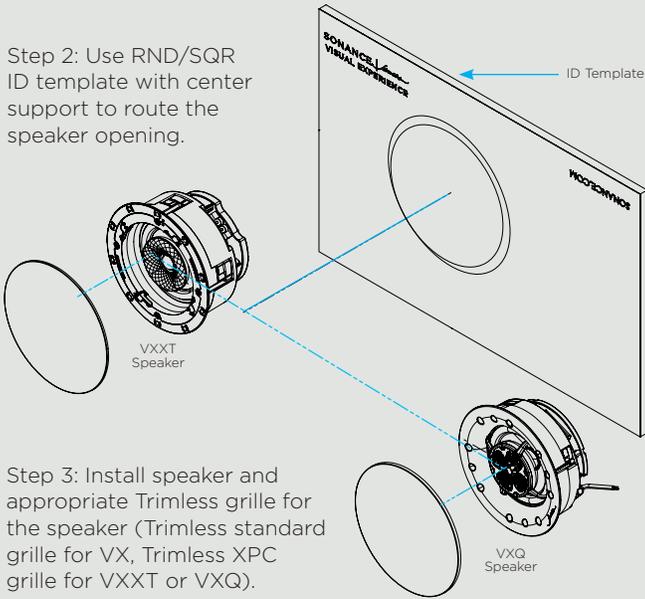

# TRUFIG MOUNTING SYSTEM

## ROUTER TEMPLATES FOR SOLID SURFACE

Step 1: Route the pocket for the grille shape at the specified depth, using the depth tool for precision power tool adjustment.

Step 2: Use RND/SQR ID template with center support to route the speaker opening.

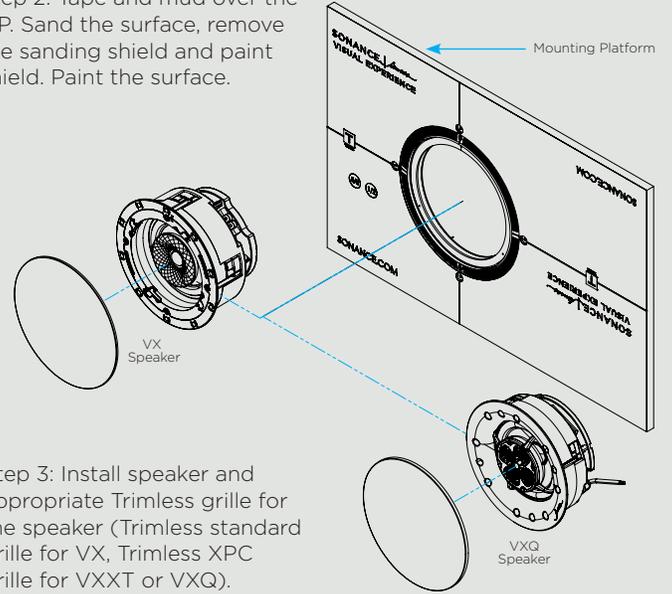

Step 3: Install speaker and appropriate Trimless grille for the speaker (Trimless standard grille for VX, Trimless XPC grille for VXQT or VXQ).

## 1/2" OR 5/8" GYPSUM MOUNTING PLATFORMS FOR DRYWALL

Step 1: Attach Gypsum MP to ceiling joists. Install drywall up to each side.

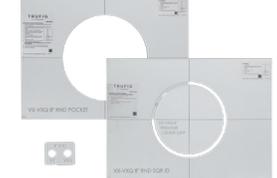

Step 2: Tape and mud over the MP. Sand the surface, remove the sanding shield and paint trim shield. Paint the surface.

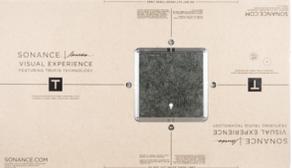

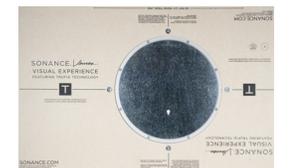

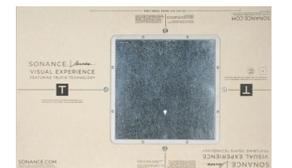

Step 3: Install speaker and appropriate Trimless grille for the speaker (Trimless standard grille for VX, Trimless XPC grille for VXQT or VXQ).
