Care and use

Before first use, it is essential to hand-wash the cookware thoroughly. When utilising the cookware, it is suitable for use on hobs only, including induction hobs. For optimal energy efficiency, ensure that the cookware is placed on hob rings that are equivalent to its base size. Take care not to let flames overlap the sides or handles of the cookware. To enhance the longevity of the product, it is advisable to use utensils made from silicone, wood, or nylon, and metal utensils should be avoided. Do not overheat the cookware or allow it to boil dry, and never leave it unattended while in use. To prevent pitting, avoid leaving salty foods in the cookware before or after cooking. Additionally, when using ceramic hobs, always lift the cookware rather than dragging it across the hob surface. Be aware that screws may loosen over time, so it is prudent to retighten them carefully with a screwdriver if necessary. For cleaning and storing the cookware, always allow it to cool before cleaning. While the cookware is safe for dishwasher use with mild detergents, it is recommended to hand-wash it with a non-abrasive sponge, rinse, and dry thoroughly. Never store wet cookware. As a safety precaution, always use heat-resistant oven gloves when moving the cookware, and avoid exposing hot cookware to cold liquids. If you notice any evidence of damage to the cookware, dispose of it carefully.
