## Pan-Tilt Indoor Cam

One camera. Every angle.

1080p HD Video &  
Color Night Vision

360° Pan  
Coverage

Live View &  
Two-Way Talk

Manual Audio &  
Video Privacy Cover

Plug-In  
Power

Smart Alerts &  
Real-Time Notifications

### Bye-bye blind spots.

Wall to wall. Floor to ceiling. With Pan-Tilt Indoor cam, you can easily control your camera's view from the Ring App. Pan left to right for a smooth 360° view, or tilt up and down 169° to find the perfect angle. Just plug-in and place to secure any space with real-time HD video.

### Check in on the action.

Stay connected to home anytime, anywhere. If something's up, you'll know as soon as Pan-Tilt Indoor Cam does and can respond to what's happening instantly. It'll even tell your other cams to start recording - and capture motion up to 6 seconds early to help show the whole story. Subscription required, sold separately.

### Privacy at your fingertips.

Feel safe knowing your home's privacy is protected with thoughtful features that put you in control of when Pan-Tilt Indoor Cam is active. Turn off your camera and microphone with the manual Privacy Cover. Swivel it to the side to reactivate or remove it entirely for total protection at all hours.

## Frequently Asked Questions

### What is the difference between Pan-Tilt Indoor Cam and Stick Up Cam with Pan-Tilt?

There are several differences. Pan-Tilt Indoor Cam is an indoor-only camera and Stick Up Cam with Pan-Tilt is weather-resistant and can go indoors or out. Pan-Tilt Indoor Cam has more field of view coverage with 169° tilt coverage while Stick Up Cam with Pan-Tilt has 117° tilt coverage. For Pan-Tilt Indoor Cam, the camera cannot be separated from the pan-tilt mount, a manual removable Privacy Cover is included, and it has the ability to be placed on a flat surface or mounted on a ceiling or wall. In contrast, Stick Up Cam with Pan-Tilt's camera can be used separately from the pan-tilt mount, it does not include a privacy cover, and it can be placed on a flat surface or mounted on a wall, but cannot be mounted on a ceiling.

### What's the Privacy Cover and how does it work?

Pan-Tilt Indoor Cam comes with a manual, removable Privacy Cover. When you slide it in front of the camera lens, Pan-Tilt Indoor Cam's camera and microphone will turn off. When you're ready to turn Pan-Tilt Indoor Cam back on, just swivel the Privacy Cover to the side. And if you're ever unsure how you left it, you can check the status of your camera in the Ring App at any time.
