

CRC Ultra Lite 3-36® Ultra Thin Non-Stain Lubricant

Product Description

Best for clean, light lubrication on items that need to be handled after application. You can't afford residue that causes rework. Some maintenance jobs demand a cleaner touch—where oily films, dust buildup, or fingerprints can ruin the finish or function. CRC® Ultra-Lite 3-36® leaves a dry, non-staining film that seals out moisture, resists dirt, and prevents corrosion without slowing your process. Working between -40°F and 300°F, it's the invisible layer of insurance every technician wishes they had. Because the best protection is the kind you never have to clean up.

Applications

Locks, latches, hinges, gauges, taps, dies, fixtures, fans, precision metal processing equipment, metal plating, coin mechanisms, solid work surfaces, clips, springs, control buttons, switches, bushings, window slides and rollers.
