## T4A

# 2x2 Architectural LED Troffer

# **Product Description**

The T4A Architectural LED Troffer is an economical lighting solution for commercial, educational, medical, and retail applications where general-purpose ambient lighting is required. With its contemporary center lens design, T4A provides a soft natural glow and even illumination that minimizes glare. The fixture also features a pre-mounted driver with a high-efficiency, maintenance-free LED chamber that's ideal for schools, hospitals, airports, offices, or convenience stores. Available in 1x4, 2x2, or 2x4 configurations, T4A is an easy-to-install upgrade from linear fluorescent lighting to a long-lasting, energy-efficient LED solution.

#### Construction

- Durable steel construction with powder coat finish
- High efficiency, maintenance-free LED chamber
- Smooth formed sides for safe handling

### **Optical System**

- Precision engineered polystyrene diffuser
- No visible diodes, hot-spots, or shadows providing high uniformity, and reduced glare

#### Electrica

- Long-life LED system coupled with electrical driver to deliver optimal performance with 125+ lumens per watt depending on CCT
- Driver delivers full-range dimming from 0 10VDC
- Operating temperature rating of 0°F to 100°F (-18°C to 38°C)
- Input voltage of 120-277VAC
- Meets FCC Part 15B: 2016 Class A requirements

## Mounting and installation

- · Quick and easy single person installation
- Features an integral driver for easy installation
- $\bullet \ Mounting \ holes \ provided \ for \ seismic \ wire$
- Certified for direct contact with insulation
- For installations where power surge may be possible, NICOR recommends installing additional surge protection at the fixture or electrical distribution panel

#### **Finish**

· Matte white powder coat finish

### Warranty

- 5-year limited system warranty standard
- Warranty does not cover product failure due to an overvoltage event (power surge.)
- •TM-21 Projected L70(9k) life >180,000 hours
- $\bullet\,\text{LM-79, LM-80 testing performed in accordance with IESNA standards}.$

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
