ARMADILLO® STAINLESS

Design Features:

ARMADILLO Stainless shells are precision formed of stainless steel with an inside liner of neoprene. They feature a permanent gasket-sealing system that requires no re-entry kit or cleaning upon re-entry, and an integral air flange and grounding lead that allow pressurization and grounding through the shell. Each shell kit consists of a top shell half, bottom shell half, LOCK-BAR™ fasteners and torque bars.

For over 30 years, our Stainless Steel Splice Case has been the industry standard, with millions of successful applications around the world, protecting communications cables under even the most severe conditions. This is our premium series for the most demanding applications. It offers superior performance and versatility for virtually any application.

ARMADILLO SELECTION GUIDE

Interchangeability:

The interchangeability of the ARMADILLO Stainless components allows you to configure your products. **Just follow these simple steps:**

STEP ONE

Use this table to select the size of the ARMADILLO Stainless required based on the pair count.

STEP TWO

Choose from one of the ARMADILLO Stainless Kits with drillable end plates or the Filling Flange Kits with drillable end plates.

STEP THREE

Select and order the individual components you need.

All components are interchangeable. You can have a closure with a Drilled End Plate on one end and a Sealing Washer End Plate on the other.

Drillable End Plates

Power End Plate Cutter

ARMADILLO® DRILLABLE END PLATE

These end plates offer a more rugged design that can take on your most demanding environments, and are the preferred choice for vault applications. ARMADILLO Drillable End Plates also feature the LOCK-TAPE™ sealing system which has consistently provided superior cable sealing and pullout strength for more than 20 years.

Drillable End Plate features include:

- Best solution when flexibility of drilling pattern is required
- Designed to accept a wide variety of cable quantities and diameters
- Field drillable to customize for specific application needs
- Available with integrated inserts for grounding or aerial suspension
- Available with inserts to allow attachments for air pressurization
- Uses field proven LOCK-TAPE sealing system
- Available in 2 section and 3 section designs

ARMADILLO Drillable End Plates are available in two and three section designs for use with 4" (102 mm), 6.5" (165 mm), 8.0" (203 mm), 9.5" (241 mm), and 12.5" (318 mm) diameter shell kits.
