## **Care and use**

Before first use, ensure the cookware is thoroughly hand-washed. This cookware is suitable for use on hobs only, including induction. For optimum energy efficiency, position the cookware on hob rings that correspond to its base size, and avoid allowing flames to overlap the sides or handles. To enhance the longevity of the cookware, it is recommended to use utensils made from silicone, wood, or nylon. Take care not to overheat the cookware or allow it to boil dry, and never leave it unattended while in use. Please note that the non-stick coating may discolour over time, although this does not impact the cookware's functionality. To protect ceramic hobs, always lift the cookware rather than dragging it across the surface. Be aware that screws may loosen over time; if necessary, use a screwdriver to carefully retighten them. For cleaning, always allow the cookware to cool before washing, as it is not dishwasher safe. Instead, clean it by hand using a mild detergent and a non-abrasive sponge, then rinse and dry thoroughly. Ensure that you do not store wet cookware. Always handle the cookware with heat-resistant oven gloves, and avoid exposing hot cookware to cold liquids. If there is any indication of damage to the cookware, dispose of it carefully.
