Care and use

Before first use, it is essential to hand-wash the overware and dry it thoroughly. The overware is suitable for use in domestic ovens, with a maximum temperature of 230 °C or Gas Mark 8. To prevent sticking, lightly coat the inner surface with oil or butter. Avoid using metal utensils, and never overheat the overware or subject it to sudden temperature changes. When cleaning, allow the overware to cool completely before moving or cleaning. It is advisable to remove the overware from the dishwasher immediately after the cycle is completed and ensure it is dried thoroughly. For stubborn stains, use a non-abrasive plastic mesh or pad with warm, soapy water, and do not soak the overware. When storing, do not keep it wet, and if stacking, place a layer of paper in between to prevent scratching or damage. Always employ heat-resistant oven gloves when handling hot overware and discontinue use if the overware shows any signs of damage or defects.
