Dynarex Collagen Wound Dressings are made from purified bovine collagen, designed to maintain a moist wound environment and to support healing for partial and full-thickness wounds.

- 100% bovine Type I collagen wound dressings designed for partial and full-thickness wounds
- Biodegradable gel forms upon contact with wound exudate to maintain a moist healing environment
- Pliable, absorbent dressing easily conforms to irregular wound surfaces for comprehensive wound coverage
- Sterile, single-use dressings, individually packaged in sterile pouches for optimal hygiene and convenience
- Suitable for use on pressure ulcers, diabetic ulcers, venous ulcers, partial thickness burns, and surgical wounds
- Available in multiple sizes to accommodate various wound types
